Subject: "Submission on Rec 34: Review required labelling of irradiated foods".

"Submission on Rec 34: Review required labelling of irradiated foods".

To Whom it May Concern

I wish to submit that all irradiated food in Australia be continued to be clearly labelled. I live in NZ and we are receiving more and more irradiated food from Australia. I do not want to eat irradiated food and will avoid all Australian food, if that which is irradiated is not clearly labelled.

I am very disappointed and concerned that FSANZ is considering removing labelling from food that has been irradiated when it is clear that both the public and world standards demand that it be labelled. It is a consumer right to know what we are eating and you are dishonouring that right when you remove the labelling. I already avoid Australian mangos as they are irradiated and as I have already said I will avoid ALL food from Australia if you do not label it fully when irradiated.

Thank you
