**Primary Production & Processing Requirements for Raw Milk Products**

I would like to express my concern with regard to the availability of raw milk products. My children have both had intolerances to milk over the years but have been able to consume raw milk. I object strongly to my right to choose whole, unprocessed foods being taken away. It is well known that pasturising milk removes the essential enzymes needed to actually digest it and the hypothetical risks of raw milk can be eliminated by having clear handling regulations. Please do not remove my right to choose a healthy lifestyle for my family.

Regards
