submission re proposal p1009, primary production and processing requirements for raw milk products  
Dear Sir/Madam,

This is another example of peoples rights being eroded. I do not and will not drink milk that has been pasturised or homogenised. As a child my father would milk the jersey cow and my mother would separate the cream which we would have on our cereal. It was the most healthiest and most tastiest milk I have ever had and thats the way we should have it.  
For goodness sake when will people stop adding, changing, mixing up an already natural and wonderful food. Leave the milk alone. Dont ban raw milk, infact it would be an absolute tragedy if you did, leave the milk alone.  
regards Alexandra Ranken
