Submission re Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

To whom it may concern.
Thinking that I was lactose intolerant, I have not been able to enjoy dairy in Australia. Traveling overseas and consuming French and Italian cheeses I have found that I am not dairy/lactose intolerant but that it is the processing of dairy that I have reactions to. I have experienced better health from consuming raw dairy products overseas but am limited to these benefits whilst living in Australia. For my health and others I ask that this be considered when deciding to legalize the farming and consuming of raw dairy in Australia.

Thank you
