SUBMISSION

Proposal P1007 Primary production and processing requirements for raw milk products.

Hello my name is Luke Foster of 50 Hyland st Warrnambool

ph 0411158588 livingplumbing@westvic.com.au

I would like to see changes in milk laws allowing the sale raw unpasturised milk for human consumption.

As a teenager I stoped drinking milk products because I had trouble digesting them. In my 30,s I have started drinking raw milk and found no problems with digesting it and it has been wonderful for my health and vitality. I consume more than 8 litres of raw milk a week . This I have to go out of my way to obtain because no one is allowed to sell it to me to drink. My wife and child also drink the raw milk I obtain.

I sometimes do plumbing work at farms and the families all drink there farms raw milk so I imagine almost all milk produced in australia is tested on humans every day and I havn't been reading about people dieing from it in the papers. so most milk must be good.

I mostly get my milk from Organic, Bio dynamic farms where the cows are allowed to grass feed mostly.

I think if a farm has a clean bill of health they should be allowed to sell it straight to the consumer or sales outlet without pasturisation .

I look forward to the day when I can by my raw milk without risking somones livlyhood by selling it to me. Thanks Luke Foster.

I find it outrageus that I can by raw cheese from another country in australia but not if it is made here.

are we trying to subsidise other countrys dairy indistrys ?

please allow the sale of raw australian cheese

thank you Luke Foster
