**Subject:** Submission: for Proposal P1007 - Primary Production and Processing Requirements for Raw Milk  
**Follow Up Flag:** Follow up  
**Flag Status:** Blue

To whom it may concern:

As a raw milk consumer, I would like FSANZ to facilitate and/or provide the following:

- Easy access to clean, unprocessed milk from local dairies with healthy cattle
- The reassessment of outdated science and non-science which condemns raw milk as a carrier of pathogens and consider science-based recommendations for consumption of raw milk.
- Certification of raw milk which ensures its cleanliness and its healthful properties remain intact
- Regulations which require raw milk and raw cheeses to be traded via localised, cottage industry

Yours sincerely,

--
