To whom it may concern,

[Submission for Proposal P1007 - Primary Production and Processing Requirements for Raw Milk \(Australia only\)](#)

I would like to voice my support for changes to the regulations associated with the sale of raw milk and raw milk products in Australia.

I am in favour of legislating for the sale of safely produced, natural raw milk and milk products. I believe that many of the health problems that have become common place such as increase in food allergies in children are a direct result of additives and processing of natural foods. These widely accepted practices could be destroying the beneficial content of foods and reducing our resistance to diseases.

I trust that you will listen to the thousands of consumers through-out Australia (and the world) who are enjoying the health benefits of raw milk, and change the laws to make this valuable food more readily available.
