15th September, 2008

I would like to present our submission re. the current changes under debate regarding the use and consumption of unpasteurised milk, produced by local farmers in organic and sanitary conditions. I feel very strongly that we should have the right to access a natural and wholesome food to sustain good health.

Research points to the enormous benefits of raw dairy products as opposed to pasteurised and homogenised dairy products.

The law should support freedom of choice for individuals who take responsibility to maintain their health, while reducing the cost of medical expenses on the government.

Thank you for the receipt of this submission.

Sincerely,

Jim Frousheger and Laura Towers.
