To Whom it May Concern

Please note that I want my children and grandchildren to be able to consume raw milk - as I did as a child. In this day and age where obesity is a major health concern and has become so along with the rise of processed foods, please allow health conscious folk the opportunity to make food choices for ourselves. I want to be able to drink raw milk that comes from disease free herds, fed on green pastures, and been bottled in clean surroundings.

If raw milk was bad for humans we would have died out eons ago, as that was all that was available until very recent times. I believe we would all be healthier if able to consume raw milk.

Please don't take away another of my basic rights!

Yours sincerely
