**Re: Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products**

**I am in favour of safely produced, natural raw milk.**

I have followed this issue with some interest and can personally testify to the benefits of a whole raw milk product.

The tendency to base decisions on how our food is processed and packaged are too often focussed on profit and economics, rarely considering nourishment and food value.

Our dairy industry in the South West is close to collapse partially due to successive State and Federal Government apathy and indifference.

Anyway. . . . .

Natural raw milk is the way to go. I anticipate that large supermarket chains would ultimately like to see a cheap Chinese milk laden with hidden toxins as a more profitable product

**I am in favour of safely produced, natural raw milk.**
