My husband and I have drunk raw milk for most of our lives as well as our children and grandchildren. We are organic dairy farmers and believe we have the total edge on raw milk with no herbicides, pesticides etc. Never ever have we had a problem with drinking raw milk. Raw milk is a real food and helps us women with osteoporoses as well as strong bones and none of our family has ever had any broken bones. We also have a pregnant daughter drinking raw milk as I did , with no problems as many farming women have done before us. Please listen to our concerns to allow the public to have a choice of what milk product they can choose for their families.  
Kindest regards  
Glenys
