**ProposalP1007:Primary Production & ProcessingRequirements For Raw milk products..**

**Dear sir/madam,**

**I am an 63 yr old male, and in good health(touch wood) and have since a child grown up with fresh raw milk,and have never had a days illness as a result of it.**

**To go into its benifits is too lengthy, and am sure you would not give it the time of day..as i do not have the adequate qualifications in this field, besides having a dairy of my own for 30 yrs.**

**since selling my dairy, I have been aquiring my fresh milk from a farmer in Warwick, at great expense to me, and has traveled from Warwick to the Gold Coast in an unrefrigerated vehicle...all yr round once every 2 weeks. And i am as sound and healthy, if not better than all you on Pastuerised milk Quaffers.**

**With todays checks and inspections.. all those fears of contaminated milk no longer apply.. the cost of something going wrong can cost a person millions ..so everyone is now aware of the necessity of good hygene.**

**There are 8 of us in our family that only drink FRESH milk and none the worse for wear..**

**Besides the snakes, crocodiles and Criminals, we also have rights..which we are deprived of because of outdated beaurocracy.**

**Acceeding to our request, is not going to endanger anyones life, with good hygene management**

**Your faitfully**
