**Submission of Olive McRae relating to: Proposal P1007-Primary Production requirements for raw milk products.**

I would like to see raw milk available to the public.  
Raw milk has many health benefits & I believe that it should be for the consumer to choose how they receive the product they desire.  
The decision to consume raw milk should be available to anyone.  
I do not believe that the government should dictate to people that they can only consume milk that has been pasteurized.  
Please give people the freedom to choose.

Regards
