Re: PROPOSAL P1007 – Primary Production & Processing Requirements for Raw Milk Products

I have been studying and eating what I believe to be healthy foods since the early 1970's. I am now a very healthy almost 70 year old.

I find it hard to believe that the "powers that be" allow us to sell/consume any amount of **alcohol** that is known to be detrimental to health, sell/smoke **cigarettes** that are also known to be detrimental to health, not to mention all the over-processed foods containing any number of **poisonous additives**, and **sugars** and **soy** which are known to feed cancers etc., YET WE ARE NOT ALLOWED TO PURCHASE OR CONSUME GOOD HEALTHY RAW MILK THE WAY NATURE INTENDED IT TO BE.

Processed/pasteurised milk kills all the necessary nutrients making it indigestible and causing all number of health problems.

Sugar feeds cancer – see the Canhelp web site – www.canhelp.org The incidence of cancer is now quoted by the AMA as affecting one person in three and soon to be one in two, and there are studies that show the increase in cancer cases is directly parallel to the consumption of sugar which is in virtually all processed foods.

Soy products (now all genetically modified) are also related to many cancers. See article by Paul Chek re the Truth about Soy and the Human Body –

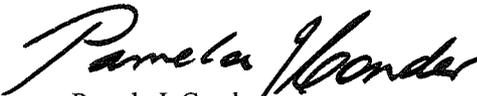

web site www.ptonthenet.com/displayarticle.aspx?ArticleID-2399

Lots more of the same in Kaayla T. Daniel, PhD, CCN's book, "The Whole Soy Story"

See the Weston A. Price web site – www.westonaprice.org for further study on all matters pertaining to good natural nutrition.

YOUR RULES ARE KILLING OUR PEOPLE. You too, will have (if not already) someone you love affected by cancer.

Please keep me informed of the outcome of the raw milk campaign.

Pamela J. Conder
