Regarding Proposal P1007: Primary Production & Processing Requirements for Raw Milk Products.

To Whom It May Concern:

**I am in favour of safely produced, natural raw milk.**

As a mum of a child who has suffered horrific and debilitating eczema from 6 months and was diagnosed with an allergy to conventional milk and dairy products (and further supervised elimination diets confirmed a continued allergy/intolerance to conventional milk products) I was amazed to see that not only did raw milk fail to produce an allergic reaction externally but substituting raw milk and dairy products (again under supervision) brought great improvement to my son's condition. We continue to confirm that the conventional allergy is ongoing. Raw milk is the only way ahead for us.

Thank you,
