SUBMISSION – proposal P1007:Primary Production & Processing Requirements for Raw Milk Products

From: Lynn and Stephen Kendall  
Kurrajong Sanctuary,  
147 Nightingale Avenue,  
Burpengary Qld. 4505

14<sup>th</sup> September, 2008

I wish to present my submission about the current changes under debate regarding the use and consumption of unpasteurised milk, produced by local farmers in organic and sanitary conditions.

I feel very strongly that myself and my family should have the right to access a natural and important food that we believe is an important part of our plan to prevent the bad health that has so obviously affected a large

Percentage of Western society, through over processing and greed for commercial gain. Why should the commercialised milk industry lobby away my right to drink raw healthy fresh cream, milk and butter products.

All my research points to the enormous benefit of raw dairy products, as opposed to the proven detrimental effects of pasteurisation, rendering milk unrecognisable by the human digestion, and so causing many problems.

There has been a marked and noticeable improvement in the health of myself and my husband, since avoiding processed foods, particularly pasteurised, homogenised dairy products.

I support the production, cultivation and distribution of Raw Milk Products that have been carefully and hygienically produced for the benefit of our health, and freedom of choice. The law should support freedom of choice

for individuals such as myself and my family, who have taken the responsibility to maintain our health.

Thank you for the receipt of this submission.

Sincerely,  
Lynn and Stephen Kendall.
