Hi People..

All milk was originally Raw, until factory farms were introduced. Then when the animals were confined they produced lousy milk.

Peter Beatie recently said he grew up on raw milk, the Royal family drinks raw milk, in fact all around the world people including the French, Germans and numerous other nations, [parts of California and other states], all have access to Raw milk.

In fact the Child Study Association founded by doctor Alan Carrol was founded in Sydney on its application of raw Whey, cheese and Milk to young children with amazing results.

Doctor Alan Caroll also started the Royal Anthropological Society of Australia, which involved the Study of native cultures in our region.

He wrote the famous book of its time "Health and Longevity" which thousands of people in Sydney revered and followed. All through the books he wrote, adds for raw whole milk were promoted, and inspections welcomed. Any farm that doesn't welcome inspections has something to hide, and that is where the public service should step in.

We should have the right to choose, when our rights to purchase natural foods are taken away, it affects us all, not some all, we all suffer, everyone.

Our health is at an all time low, *all* people now are in the same boat, the inability to buy wholesome, whole natural unprocessed foods, just like nature.

I suggest that now is the time to think of your kids, and others, and do the right thing, that is, organic clean farms, that are in production now, that could easily switch.

The main reason they don't, is the public service, and its acts and statutes

We are in the public, once the public service make acts and statutes to stop people getting wholesome foods, the public service suffer as well.

The question is, how many more years are we all going to put up with rules made in the 1920's?

We have a mass info medium like the internet.

Look up 1986 in the US, where 3,000 people were poisoned from drinking "conventional" milk, 200 died.

This is by far the worse poisoning from milk, not Raw, but ;" conventional.

Have a great day, and realise what the right thing to do is, inspect farms, and above all let the public inspect, and let the public choose, after all, we are all the public, Pete
