Hi there,

Please find attached latest version of the briefing note.

We've received feedback from FSANZ (minor and incorporated), EPA (mostly incorporated / to be discussed further tomorrow morning), and Treasury. Treasury's advice is still to be incorporated but is as follows:

- comfortable with the consultation document going out with the 3 options proposed.
- expand the section on what the changes will deliver to NZ (particularly, outlining the potential environmental and health benefits as well as the economic benefits of these new technologies).
- in the *Risks and Mitigations* section say that we'll manage communication risks by giving clear messages about the potential benefits of these techniques, and why we are confident that they're low-risk.
- The briefing note mentions the needs to clarify positions around null-segregants and chemical mutagenesis as well, but the doesn't discuss how these issues will be covered in the consultation material. Do we need to outline the major questions or options that will be presented around these issues?

MPI's feedback (and possibly DPMC) is due tomorrow morning.

Cheers, [REDACTED]
