**Subject:** Submission on Review of mandatory labeling of irradiated food.

**Importance:** High

Tony and Andrea Norton  
[REDACTED]

We believe the current labeling requirement should be retained, and be strengthened to include individual labeling of loose irradiated produce.

We are concerned that customers will not be able to make an informed decision when purchasing fresh produce if the labeling is not applied.

We understand that some means of eradication of fruitfly on fresh produce needs to be undertaken to keep New Zealand fruitfly free.

Yours Sincerely  
Tony and Andrea Norton
