Subject: Submission on Rec 34: Review required labelling of irradiated foods

Follow Up Flag: Follow up
Flag Status: Completed

FSANZ and Food Forum Ministers,

I strongly object to any proposal to discontinue labelling of irradiated foods. Labelling laws in Australia are loose enough already, consumers are regularly confused and hoodwinked. Please do not worsen this situation. As a food grower and producer, and as a chef I believe it is critical not only for our health but also for the sustainability of our small food producers that clear and accurate labelling be applied.

Irradiated food labelling must continue, with the stronger and clearer words "irradiated" or "treated with irradiation" included on the labels.

Thank you for giving this your due consideration.

Liz Waters
Director
