PROTEIN	Protein sequence database comprised of GenBank release 163.0
TOXIN6	Toxin protein sequence database

## 1.0 Summary

Monsanto Company has developed insect-protected soybean MON 87701 that produces the Cry1Ac insecticidal crystal (Cry) protein ( $\delta$ -endotoxin) derived from *Bacillus thuringiensis* (*B.t.*) var. *kurstaki*. The Cry1Ac protein provides protection from feeding damage caused by targeted lepidopteran insect pests. The nucleotide sequence of the *cry1Ac* gene in MON 87701 was confirmed by molecular characterization study (Arackal et al., 2008).

The safety assessment of biotechnology-derived crops evaluates potential health effects through a comprehensive approach, which includes bioinformatic analysis of the amino acid sequence of the introduced protein to ensure the protein is not similar to allergenic, toxic, or other proteins that may adversely affect animal or human health. Bioinformatic analyses were performed to assess the potential for allergenicity, toxicity, or biological activity of the Cry1Ac protein sequence.

The FASTA sequence alignment tool was used to assess structural similarity between the Cry1Ac protein sequence and known allergens, toxins, or other biologically active proteins. Although the FASTA program directly compares amino acid sequences (i.e., primary protein structure), the alignment data may be used to infer higher order structural similarities (i.e., secondary and tertiary protein structures). Proteins that share a high degree of similarity throughout their entire lengths are often homologous. Homologous proteins share secondary structure and common three-dimensional folds. Therefore, proteins homologous to allergens are more likely to share linear and/or conformational cross-reactive allergenic epitopes than are unrelated proteins. Potential structural similarities between the Cry1Ac protein sequence and known allergens (AD8 allergen database) were examined. The extent of each similarity was evaluated by visual inspection of the alignment, the calculated percent identity, and the *E*-score value for that alignment. Guidelines were also followed regarding the minimum identity and alignment length for FASTA results from the AD8 search for potential allergenicity of novel proteins in food crops (Codex, 2003). The current allergen, gliadin, and glutenin sequence database (AD8) was assembled from sequences found on the FARRP allergen database dated January 2008 located at <http://www.allergenonline.com> (FARRP, 2008). Potential structural similarities between the Cry1Ac protein sequence and potential toxins were examined using an all-inclusive protein database (PROTEIN database).

The Cry1Ac protein sequence was also screened against the AD8 sequence database using an eight amino acid sliding window search. In these analyses, any sequences of eight or more linearly contiguous amino acids that were found to be identical between the Cry1Ac protein and proteins in the AD8 database were defined as immunologically relevant, in that they may indicate the presence of potentially cross-reactive allergenic epitopes.

These bioinformatic search results indicate that no biologically relevant structural similarities to allergens, human and animal toxins, or other proteins that may adversely affect animal or human health were observed for the Cry1Ac protein sequence. Furthermore, no short (eight amino acid) polypeptide matches were shared between the Cry1Ac protein sequence and proteins in the allergen database.

Taken together, these bioinformatic search data indicate the lack of both structurally and immunologically relevant similarities between the Cry1Ac protein sequence and known allergens, toxins or other biologically active proteins that may have an adverse effect on the health of human or animals.

## 2.0 Introduction

Monsanto Company has developed insect-protected soybean MON 87701 that produces the Cry1Ac insecticidal crystal (Cry) protein ( $\delta$ -endotoxin) derived from *Bacillus thuringiensis* (*B.t.*) var. *kurstaki*. The Cry1Ac protein provides protection from feeding damage caused by targeted lepidopteran insect pests. The nucleotide sequence of the *cry1Ac* gene in MON 87701 was confirmed by molecular characterization study (Arackal et al., 2008). The Cry1Ac protein sequence was used as a query for FASTA and eight amino acid sliding window searches using the Allergen Database (version 8.0, AD8) and for a FASTA search of a public protein sequence database (PROTEIN).

The safety assessment of genetically enhanced crops evaluates potential health effects through a comprehensive approach, which includes bioinformatic analysis of the amino acid sequence of the introduced protein to ensure that the protein does not have homologous similarity to allergenic, toxic, or potentially biologically active proteins that are known to cause adverse health effects. Bioinformatic analyses were performed to assess the potential for allergenicity, toxicity, or biological activity of the Cry1Ac protein sequence.

Exposure to allergens in foods may cause sudden, severe life-threatening reactions in susceptible individuals. Gliadins and glutenins are suspected to cause celiac disease, a non-IgE mediated allergic disorder (gluten-sensitive enteropathy), and are also considered important immunologically active proteins. Screening the amino acid sequences of proteins introduced into plants by modern biotechnology for similarity to sequences of known allergens, gliadins, and glutenins is one of many assessments performed to support product safety. Similarly, the amino acid sequences of introduced proteins are also screened against a toxin-enriched dataset as well as all known proteins in publicly available genetic databases.

The FASTA algorithm can be used to evaluate the extent of sequence similarity between a query protein sequence and several database sequences. In principle, if two proteins share sufficient linear sequence similarity and identity, they will also likely share three-

dimensional structure and, therefore, functional homology. By definition, proteins with enough similarity to be homologous proteins share secondary structure and common three-dimensional folds (Pearson, 2000). Because the degree of similarity between homologs varies widely, the data need to be carefully evaluated in order to maximize their potential predictive value. The allergenicity assessment is used to identify known allergens or potentially cross-reactive proteins. While related (homologous) proteins may share 25% amino acid identity in a 200 amino acid overlap (Pearson, 2000), this is not generally sufficient to indicate IgE mediated cross-reactivity (Aalberse et al., 2001). Indeed, allergenic cross-reactivity caused by proteins is rare at 50% identity and typically requires >70% amino acid identity across the full length of the protein sequences (Aalberse, 2000). A conservative approach is currently applied by which related protein sequences are identified as potentially cross-reactive if linear identity is 35% or greater in an 80 amino acid overlap (Thomas et al., 2005; Codex, 2003). Such high levels of identity are readily detected using FASTA. Additionally, proteins closely related to gliadins or glutenins, the proteins that trigger celiac disease, can be easily identified using FASTA. A second bioinformatics tool was used to specifically identify short linear polypeptide matches to known or suspected allergens. It is possible that proteins structurally unrelated to allergens, gliadins, and glutenins may still contain smaller immunologically significant epitopes. A query sequence may be considered allergenic if it has a sequence identity of at least eight linearly contiguous amino acids with a potential allergen epitope (Metcalf et al., 1996; Hileman et al., 2002; Goodman et al., 2002). However, most allergen epitopes have not been confirmed and the amino acid length for those that have been identified can vary widely, thus the relevance of an exact match of eight amino acids may have limited immunological relevance (Thomas et al., 2005). The eight amino acid bioinformatic strategy is currently an *in silico* search that can produce matches containing significant uncertainty depending on the length of the query sequence (Silvanovich et al., 2006).

This report describes the bioinformatics assessment of the Cry1Ac protein present in MON 87701 soybean. Inspection of the bioinformatic alignment analysis can be used to indicate whether the Cry1Ac protein sequence is structurally congruent and significantly similar to known allergens, toxins, or other biologically active proteins.

### 3.0 Purpose

The purpose of this study was to evaluate, using bioinformatics techniques, the level of similarity of the MON 87701 soybean Cry1Ac protein sequence to known allergens, toxins, or other biologically active proteins. Sequence identity and amino acid similarities to known allergens, toxins, and other proteins were assessed using the FASTA and sliding eight amino acid window searches.

## 4.0 Methods

### 4.1 Sequence Database Preparation.

The allergen, gliadin, and glutenin sequence database (AD8) was assembled from sequences obtained from the FARRP allergen database<sup>1</sup> (FARRP, 2008). The protein sequences in the FARRP allergen database were assembled and evaluated for evidence of allergenicity by an international panel of allergy experts. Gene identification (GI) numbers for each of the 1,311 sequences found in the FARRP database were used to assemble a list, and this list was used to batch query the NCBI protein sequence database<sup>2</sup>. For obsolete GI numbers found using the batch search, the GenPept format flat file associated with each obsolete GI number was examined and an up-to-date GI number was used to replace the obsolete GI number. Due to the removal of obsolete GI numbers, collation of short peptide sequences into larger proteins, and removal of duplicates derived from the same species, a total of 1,250 GI numbers were found to be valid. These 1,250 GI numbers were used to assemble a searchable database AD8 (Appendix 1, release date; January 11, 2008).

The PROTEIN database, consisting of protein and polypeptide sequences from GenBank, release 163.0 (December 15, 2007), was downloaded from NCBI and formatted for use in this bioinformatic analysis. This database is referred to as the PROTEIN database and represents a current compilation of publicly available amino acid sequences. Toxins and other bioactive proteins that may be identified in the bioinformatic alignment search can also be identified using this same PROTEIN database.

### 4.2 Sequence Database Searches

FASTA analyses using the AD8, TOXIN6 and PROTEIN database were performed on a desktop computer loaded with a SUSE LINUX version 10.1 operating system and FASTA version 3.4t26 July 7, 2006. The DNA sequence used for translation to the amino acid sequence was supplied in the molecular characterization report for MON 87701 soybean (Arackal et al., 2008). The translated protein sequence shown in Figure 1 includes four additional amino acids, CMQA, at the N-terminus relative to native Cry1Ac that were identified as part of the characterization of plant-produced Cry1Ac protein (Bell et al., 2008). These additional amino acids are the product resulting from incomplete removal of the chloroplast targeting peptide. The DNA to amino acid sequence translation was performed with the DNASTar SeqEdit program (version 7.0.0). The structural similarity of the translated protein sequences to sequences in AD8 was assessed using the FASTA algorithm (Lipman and Pearson, 1985; Pearson and Lipman, 1988). FASTA comparisons are initiated by aligning the

<sup>1</sup> located at <http://www.allergenonline.com>

<sup>2</sup> located at <http://www.ncbi.nlm.nih.gov/entrez/batchentrez.cgi>

first match of a specific wordsize. The alignment is then extended based on the chosen scoring matrix. Default FASTA comparison parameters for wordsize (k-tuple) of two, a gap creation penalty and, a gap extension penalty were used. The expectation threshold (*E*-score) limit was set to one. The *E*-score is a statistical measure of the likelihood that the observed similarity score could have occurred by chance in a search. A larger *E*-score indicates a lower degree of similarity between the query sequence and the sequence from the database. Typically, alignments between two sequences will need to have an *E*-score of less than  $1 \times 10^{-5}$  to be considered to have significant homology. FASTA comparisons were performed using the BLOSUM50 scoring matrix (Henikoff and Henikoff, 1992). Multiple alignments are made between the query sequence and each sequence in the database with a score calculated for each alignment. Only the best scoring alignment is extensively analyzed for each database sequence. The BLOSUM matrix series (Henikoff and Henikoff, 1992) was derived from a set of aligned, ungapped regions from protein families, called the BLOCKS database. Sequences from each block were clustered based on the percent of identical residues in the alignments (Henikoff and Henikoff, 1996). The BLOSUM50 matrix will identify blocks of conserved residues that are at least 50% identical. BLOSUM50 works well for identifying sequence similarities that include gaps, and thus recognizes distant evolutionary relationships (Pearson, 2000).

The extent of structural relatedness was evaluated by visual inspection of the aligned sequences, the calculated percent identity, and *E*-score. The *E*-score reflects the degree of amino acid similarity between a pair of sequences and can be used to evaluate the significance of the alignment. Similar amino acids are structurally related and share polar, hydrophobic, or charged states. Such substitutions are referred to as "conservative" since they are unlikely to change the structure of the protein and, by inference, the function of homologous proteins. The calculated *E*-score depends on the overall length of joined (gapped) local sequence alignments, the quality (percent identity, similarity) of the overlap, and the size of the database (Pearson and Lipman, 1988; Baxevanis and Ouellette, 1998). For a pair of sequences, a very small *E*-score may indicate a structurally relevant similarity. Conversely, large *E*-scores are typically associated with alignments that do not represent biologically relevant similarity.

In addition to the FASTA comparisons of the Cry1Ac protein sequence to known allergens (to assess overall structural similarity), an eight amino acid sliding-window search was performed. An algorithm was developed to identify whether or not a linearly contiguous match of eight amino acids existed between the query sequence and sequences within the allergen database (AD8). This program compares the query sequence to each protein sequence in the allergen database using a sliding-window of eight amino acids; that is, with a seven amino acid overlap relative to the preceding window. While there have been recommendations for using a shorter scanning

window (Gendel, 1998; Kleter and Peijnenburg, 2002), only a few studies have actually investigated the ability of six, seven, or eight amino acid search windows to identify allergens (Hileman et al., 2002; Goodman et al., 2002; Stadler and Stadler, 2003). In these studies, randomly or specifically selected protein sequences were used as query sequences in FASTA and six, seven, and eight amino acid window searches against allergen databases. The results demonstrated that searches with six and seven amino acid windows led to high rates of false positive matches between non-allergenic query sequences and allergen database sequences. Additionally, searches with a six or seven amino acid window identified apparently random matches between totally unrelated proteins, such that the matched proteins were not likely to share any structural or sequence similarities that could act as cross-reactive epitopes. These studies concluded that six or seven amino acid sliding-window searches yielded such a high rate of false positive hits that they were of no predictive value. Furthermore, Silvanovich et al. (2006) recently demonstrated the lack of value for six or seven amino acid sliding-window searches in a comprehensive analysis of short peptide match frequencies by analyzing the match frequencies of peptides derived from ~1.95 million published protein sequences. In order to provide the best predictive capability to identify potentially cross-reactive proteins, a window of eight contiguous amino acids was used in the current study to represent the smallest immunologically relevant sequential, or linear IgE binding epitope (Metcalf et al., 1996).

### 4.3 Significance of the Alignment

The FASTA alignments using the AD8 database were judged according to international guidelines for potential allergenicity of proteins transferred to food crops (Codex Alimentarius, 2003). Any alignments with a minimum of 35% shared identity over at least 80 amino acids are indicative of potential allergenicity. Any exact eight amino acid matches are visually inspected for their potential to indicate shared immunologically significant epitopes.

All alignments are judged based on an *E*-score of  $1 \times 10^{-5}$  ( $1 \times 10^{-5}$ ) which was set as an initial cut-off value for alignment significance. Although all alignments were inspected visually, any sequence alignments that yielded an *E*-score less than  $1 \times 10^{-5}$  were analyzed further to determine if such an alignment represented relevant sequence similarity and potential homology.

## 5.0 Results and Discussion

Bioinformatics analysis was performed on the MON 87701 soybean Cry1Ac protein sequence (Figure 1) to assess for potential similarity to allergens, toxins, or other biologically active proteins. Summaries of the best similarities from the analysis are

shown in Tables 1-3. The supporting dataset output files for the analysis are presented in Appendices 2-5.

### **5.1 Assessment of Potential Allergenicity:**

Potential structural identity and similarity shared between the Cry1Ac protein and proteins in the allergen database were evaluated using the FASTA sequence alignment program (Appendix 2). These bioinformatic results show that no significant structural similarities were shared between Cry1Ac and proteins in the allergen database and that specifically, no sequence alignments exceeded the Codex Alimentarius guidelines (2003) for a minimum 35% shared identity over 80 amino acids (Table 1).

No immunologically relevant sequences of eight contiguous amino acid identities were detected when the the Cry1Ac protein sequence (Figure 1) was compared to the AD8 sequence database (Appendix 1) as assessed from the eight amino acid sliding window search data (Appendix 3).

### **5.2 Assessment of Potential Adverse Biological Activity:**

Potential structural similarities shared between the Cry1Ac protein and proteins in the PROTEIN database were evaluated using the FASTA sequence alignment tool. Identified proteins were ranked according to their degree of similarity (Appendix 5).

The FASTA program identified and aligned a total of 1728 proteins in the PROTEIN database that yielded an alignment *E*-score of less than 1 and of those, 1583 displayed an *E*-score less  $1 \times 10^{-5}$ . Visual inspection of these 1583 alignments revealed that most alignments were with proteins described as crystal and/or insecticidal proteins from *Bacillus thuringiensis* and the top alignment observed was to a crystal protein homolog (GI-142722) (Table 2). The alignment demonstrated 99.4% identity over 1178 amino acids with an *E*-score of 0. Upon evaluation of the alignments, none of the crystal or insecticidal proteins from *Bacillus thuringiensis* nor any of the other non-crystal proteins indicate any concern for adverse biological activity. Therefore, based on these data, the Cry1Ac protein does not share any structural congruence with any proteins that may have adverse biological activity animals or humans.

### **5.3 Assessment of Potential Toxicity:**

Potential structural similarities shared between the Cry1Ac protein and proteins in the toxin database were evaluated using the FASTA sequence alignment tool. Identified proteins were ranked according to their degree of similarity (Appendix 4).

The most significant similarity observed (Table 3) was to a delta-endotoxin (GI-142740), demonstrating 98.98% shared identity over 1178 amino acids with an *E*-score of 0 and this alignment is expected because the Cry1Ac protein present in MON 87701 soybean is a specific insecticidal toxin that shares homology with many other sequences of this family of proteins. There were no alignments to proteins other than insect-specific toxins from the TOXIN6 database. Therefore, the Cry1Ac protein present in MON 87701 soybean does not share any sequence similarity with proteins that may present toxicity to humans or animals.

## 6.0 Conclusions

A bioinformatics analysis of the MON 87701 soybean Cry1Ac protein sequences was conducted to determine if the protein shared significant structural similarities with allergens, bioactive proteins or toxins. The bioinformatics results indicate that no biologically relevant sequence similarities were observed between the full length Cry1Ac protein sequence and any known allergens, biologically active proteins, or human and animal toxins.

Taken together, these bioinformatic analyses support the lack of similarity between the Cry1Ac protein sequences and known allergens and toxins. Therefore, it is unlikely that the Cry1Ac protein present in MON 87701 soybean possess any potential for allergenicity or toxicity and support the conclusion that this protein is not harmful to human or animal health.

## Appendix 1 Allergen, gliadin, and glutenin protein sequence database (AD8)

### Aeroallergens Animals

Species	Comments	GI #	AA
Canis lupus familiaris	precursor Can f II [Canis familiaris].	29292272	177
Canis lupus familiaris	precursor Can f II [Canis familiaris].	29292274	179
Canis lupus familiaris	Major allergen Can f 1 precursor (Allergen Dog 1).	3121745	174
Canis lupus familiaris	Minor allergen Can f 2 precursor (Allergen Dog 2).	3121746	180
Canis lupus familiaris	albumin [Canis familiaris].	3319897	585
Canis lupus familiaris	albumin [Canis familiaris].	633938	265
Canis lupus familiaris	albumin [Canis familiaris].	6687188	608
Cavia porcellus	Major allergen Cav p 2.	32363133	15
Cavia porcellus	Major urinary protein (MUP) (Allergen Cav p 1).	32469617	15
Felis catus	Major allergen I polypeptide chain 1 precursor (Allergen Fel d 1-A)	1169665	92
Felis catus	fel d I chain 1 precursor with leader B [Felis catus].	1364212	88
Felis catus	fel d I chain 1 precursor with leader A [Felis catus].	1364213	92
Felis catus	major allergen I.	163825	92
Felis catus	major allergen I.	163827	88
Felis catus	cystatin [Felis catus].	17939981	98
Felis catus	Major allergen I polypeptide chain 2 precursor (Allergen Fel d 1-B)	232086	109
Felis catus	fel d I chain 2 precursor [Felis catus].	395407	107
Felis catus	Fel d 4 allergen [Felis catus].	45775300	186
Felis catus	albumin precursor [Felis catus].	886485	608
Mus musculus	Major urinary protein 6 precursor (MUP 6) (Alpha-2U-globulin)	20178291	180
Rattus norvegicus	PREDICTED: similar to Major urinary protein precursor (MUP)	109474987	181
Rattus norvegicus	Major urinary protein precursor (MUP) (Alpha-2u-globulin)	127533	181
Rattus norvegicus	Alpha-2u globulin.	81890324	181
Thaumetopoea pityocampa	Tha p 1.	74798355	18

### Aeroallergens Fungi

Species	Comments	GI #	AA
Alternaria alternata	60S acidic ribosomal protein P1 (Allergen Alt a 12) (Alt a XII).	1350779	110
Alternaria alternata	Enolase (2-phosphoglycerate dehydratase) (2-phospho-D-glycerate	14423684	438
Alternaria alternata	Heat shock 70 kDa protein (Allergen Alt a 3).	14423730	152
Alternaria alternata	major allergen Alt a 1 subunit [Alternaria alternata].	1842045	157
Alternaria alternata	ribosomal P2 phosphoprotein [Alternaria alternata].	1850540	113
Alternaria alternata	putative nuclear transport factor 2 [Alternaria alternata].	21748153	124
Alternaria alternata	major allergen alt a1 [Alternaria alternata].	21913174	115
Alternaria alternata	glutathione-S-transferase [Alternaria alternata].	41057621	231
Alternaria alternata	major allergen Alt a 1 subunit [Alternaria alternata].	45680856	157
Alternaria alternata	minor allergen, ribosomal protein [Alternaria alternata].	467617	113
Alternaria alternata	minor allergen [Alternaria alternata].	467619	204
Alternaria alternata	aldehyde dehydrogenase (NAD+) [Alternaria alternata].	76666767	497
Alternaria alternata	Protein disulfide-isomerase (PDI) (Allergen Alt a 4).	85701160	436
Arthroderma benhamiae	tri m 4 allergen [Arthroderma benhamiae].	23894232	726
Arthroderma benhamiae	tri m 2 allergen [Arthroderma benhamiae].	23894240	292
Arthroderma benhamiae	tri m 2 allergen [Arthroderma benhamiae].	23894244	404
Aspergillus oryzae	Oryzin precursor (Alkaline proteinase) (ALP) (Aspergillus	129235	403
Aspergillus fumigatus	enolase [Aspergillus fumigatus].	13925873	438
Aspergillus fumigatus	manganese superoxide dismutase [Aspergillus fumigatus].	1648970	221
Aspergillus fumigatus	large subunit ribosomal protein L3 [Aspergillus fumigatus].	21215170	392
Aspergillus fumigatus	cellular serine proteinase [Aspergillus fumigatus].	2143220	495
Aspergillus niger	xylosidase [Aspergillus niger].	2181180	804
Aspergillus fumigatus	rAsp f 9 [Aspergillus fumigatus].	2879890	302
Aspergillus niger	serine protease.	289172	533
Aspergillus fumigatus	rAsp f 4 [Aspergillus fumigatus].	3005839	286
Aspergillus fumigatus	Aspf1 allergen [Aspergillus fumigatus].	3021324	125
Aspergillus fumigatus	allergen [Aspergillus fumigatus].	3643813	427
Aspergillus niger	beta-xylosidase [Aspergillus niger].	4235093	804
Aspergillus fumigatus	PP1ase [Aspergillus fumigatus].	5019414	178

Aspergillus fumigatus	Ribonuclease mitogillin precursor (Major allergen Asp f 1) (Asp f	54039254	176
Aspergillus fumigatus	Asp FII [Aspergillus fumigatus].	664852	250
Aspergillus fumigatus Af293	allergen Asp F3 [Aspergillus fumigatus Af293].	66845476	168
Aspergillus fumigatus Af293	major allergen Asp F2 [Aspergillus fumigatus Af293].	66849502	304
Aspergillus fumigatus	rAsp f 8 [Aspergillus fumigatus].	6686524	111
Aspergillus flavus	Allergen Asp fl 1.	74665726	403
Aspergillus fumigatus	Enolase (2-phosphoglycerate dehydratase) (2-phospho-D-glycerate	83288046	438
Aspergillus fumigatus	Major allergen Asp f 2 precursor (Asp f II).	83300352	310
Aspergillus fumigatus	Allergen Asp f 4 precursor.	83300369	322
Aspergillus fumigatus	Allergen Asp f 7 precursor.	83300389	270
Aspergillus fumigatus	Heat shock protein 90 (Heat shock protein hsp1) (65 kDa IgE-binding	83303658	706
Aspergillus fumigatus	60S ribosomal protein L3 (Allergen Asp f 23).	83305621	392
Aspergillus fumigatus	60S acidic ribosomal protein P2 (Allergen Asp f 8) (AfP2).	83305635	111
Aspergillus fumigatus	Superoxide dismutase [Mn], mitochondrial precursor (Allergen Asp f	83305645	210
Aspergillus fumigatus	Probable glycosidase crf1 precursor (Crh-like protein 1) (Allergen	85540942	395
Aspergillus fumigatus	major allergen I 18kDa antigen [Aspergillus fumigatus].	9280360	150
Aspergillus oryzae	Alpha-amylase A type-1/2 precursor (Taka-amylase A) (TAA)	94706935	499
Aspergillus fumigatus	aspergillopepsin i [Aspergillus fumigatus].	963013	395
Candida albicans	Enolase 1 (2-phosphoglycerate dehydratase) (2-phospho-D-glycerate	232054	440
Candida albicans	29 kDa IgE-binding protein [Candida albicans].	37548637	236
Cochliobolus lunatus	enolase [Curvularia lunata].	14585753	440
Coprinus comatus	Cop c1 allergen [Coprinus comatus].	4538529	81
Davidiella tassiana	Minor allergen Cla h 7 (Cla h 5) (Cla h V).	1168970	204
Davidiella tassiana	60S acidic ribosomal protein P2 (Allergen Cla h 3) (Cla h III).	1173074	111
Davidiella tassiana	60S acidic ribosomal protein P2 (Minor allergen Cla h 4) (Cla h	21542440	111
Davidiella tassiana	putative nuclear transport factor 2 [Davidiella tassiana].	21748151	125
Davidiella tassiana	hydrophobin [Davidiella tassiana].	22796153	105
Davidiella tassiana	enolase; phosphopyruvate hydratase [Davidiella tassiana].	467660	440
Davidiella tassiana	Enolase (2-phosphoglycerate dehydratase) (2-phospho-D-glycerate	6015094	440
Davidiella tassiana	Heat shock 70 kDa protein (Allergen Cla h 4) (Cla h IV).	729764	643
Davidiella tassiana	aldehyde dehydrogenase (NAD+) [Davidiella tassiana].	76666769	496
Davidiella tassiana	Probable NADP-dependent mannitol dehydrogenase (MtDH) (Mannitol	85701146	267
Epicoccum nigrum	Major allergen Epi p 1 (Epi n 14625*).	24636820	18
Fusarium culmorum	thioredoxin-like protein [Fusarium culmorum].	19879659	121
Fusarium culmorum	helix-loop-helix protein [Fusarium culmorum].	25361513	450
Gibberella zeae PH-1	RLA2_ALTAL 60S acidic ribosomal protein P2 (Minor allergen Alt a 6)	46122455	109
Malassezia sympodialis	Chain B, Cross-Reactivity And Crystal Structure Of Malassezia	119390336	121
Malassezia furfur	Major allergen Mal f 1 precursor (Pit o 1).	13959403	350
Malassezia sympodialis	allergen [Malassezia sympodialis].	19069920	342
Malassezia sympodialis	manganese superoxide dismutase [Malassezia sympodialis].	28569698	237
Malassezia furfur	MF1 [Malassezia furfur].	3445490	177
Malassezia furfur	Putative peroxiredoxin (Thioredoxin reductase) (Allergen Mal f 3)	3914387	166
Malassezia sympodialis	allergen [Malassezia sympodialis].	4138171	172
Malassezia sympodialis	allergen [Malassezia sympodialis].	4138173	162
Malassezia sympodialis	allergen [Malassezia sympodialis].	4138175	187
Malassezia furfur	major allergenic protein Mal f4 [Malassezia furfur].	4587985	342
Malassezia sympodialis	allergen [Malassezia sympodialis].	7271239	179
Malassezia sympodialis	mala s 12 allergen precursor [Malassezia sympodialis].	78038796	618
Penicillium oxalicum	vacuolar serine protease [Penicillium oxalicum].	12005497	503
Penicillium citrinum	vacuolar serine protease [Penicillium citrinum].	12005501	358
Penicillium citrinum	enolase [Penicillium citrinum].	13991101	438
Penicillium chrysogenum	vacuolar serine protease [Penicillium chrysogenum].	14215732	494
Penicillium citrinum	Heat shock 70 kDa protein (Allergen Pen c 19).	14423733	503
Penicillium chrysogenum	alkaline serine protease [Penicillium chrysogenum].	21069093	398
Penicillium citrinum	unknown [Penicillium citrinum].	38326693	228
Penicillium citrinum	Pen c 1; alkaline serine protease [Penicillium citrinum].	4587983	397
Penicillium citrinum	alkaline serine protease Pen c2 [Penicillium citrinum].	4588118	457
Penicillium citrinum	peroxisomal membrane protein [Penicillium citrinum].	5326864	167
Penicillium brevicompactum	60S acidic ribosomal P1 phosphoprotein Pen b 26 [Penicillium	59894749	107
Penicillium chrysogenum	allergen Pen n 13 [Penicillium chrysogenum].	6684758	397
Penicillium chrysogenum	allergen Pen n 18 [Penicillium chrysogenum].	7963902	494
Penicillium chrysogenum	68 kDa allergen [Penicillium chrysogenum].	999009	117
Rhodotorula mucilaginosa	Enolase (2-phosphoglycerate dehydratase) (2-phospho-D-glycerate	37078092	439
Rhodotorula mucilaginosa	vacuolar serine protease [Rhodotorula mucilaginosa].	54654335	342

Scomber japonicus	parvalbumin [Scomber japonicus].	29420793	109
Trichophyton schoenleinii	tri s 4 allergen [Trichophyton schoenleinii].	23894227	726
Trichophyton schoenleinii	tri m 2 allergen [Trichophyton schoenleinii].	23894260	405
Trichophyton rubrum	Tri r 4 allergen [Trichophyton rubrum].	5813788	726
Trichophyton rubrum	Tri r 2 allergen [Trichophyton rubrum].	5813790	412

## Aeroallergens Insects

Species	Comments	GI #	AA
Argas reflexus	Arg r 1 precursor [Argas reflexus].	58371884	159
Blattella germanica	allergen Bla g 4.	1166573	182
Blattella germanica	Aspartic protease Bla g 2 precursor (Allergen Bla g II).	1703445	352
Blattella germanica	major allergen Bla g 1.02 [Blattella germanica].	4240395	492
Blattella germanica	major allergen Bla g 1.0101 [Blattella germanica].	4572592	412
Blattella germanica	36 kda allergen {peptide 143-111} [Blattella germanica=German	544618	20
Blattella germanica	36 kda allergen {peptide 143-115} [Blattella germanica=German	544619	25
Blattella germanica	Glutathione S-transferase (GST class-sigma) (Major allergen Bla g	6225491	204
Blattella germanica	Chain A, The Structure Of Mutant (N93q) Of Bla G 2.	62738637	330
Blattella germanica	tropomyosin [Blattella germanica].	8101069	284
Lepisma saccharina	tropomyosin [Lepisma saccharina].	20387027	284
Lepisma saccharina	tropomyosin [Lepisma saccharina].	20387029	243
Periplaneta americana	allergen [Periplaneta americana].	1531589	631
Periplaneta americana	allergen [Periplaneta americana].	1580792	685
Periplaneta americana	allergen [Periplaneta americana].	1580794	470
Periplaneta americana	allergen [Periplaneta americana].	1580797	393
Periplaneta fuliginosa	tropomyosin [Periplaneta fuliginosa].	19310971	284
Periplaneta americana	Cr-P11 allergen [Periplaneta americana].	2231297	446
Periplaneta americana	Cr-P11 allergen [Periplaneta americana].	2253610	274
Periplaneta americana	Cr-P11 [Periplaneta americana].	2580504	395
Periplaneta americana	allergen [Periplaneta americana].	2897849	228
Periplaneta americana	major allergen Per a 1.0105 [Periplaneta americana].	30144660	124
Periplaneta americana	major allergen Per a 1.0101 [Periplaneta americana].	4240399	231
Periplaneta americana	tropomyosin [Periplaneta americana].	4378573	284
Periplaneta americana	tropomyosin [Periplaneta americana].	4468639	284
Plodia interpunctella	arginine kinase [Plodia interpunctella].	15886861	355
Suidasia medanensis	group 2 allergen Sui m 2 [Suidasia medanensis].	45738062	141

## Aeroallergens Mites

Species	Comments	GI #	AA
Acarus siro	lipid binding protein [Acarus siro].	4049356	64
Blomia tropicalis	Blo t 21 allergen [Blomia tropicalis].	111120420	129
Blomia tropicalis	Blo t 21 allergen [Blomia tropicalis].	111120424	129
Blomia tropicalis	Blo t 21 allergen [Blomia tropicalis].	111120428	129
Blomia tropicalis	Blo t 21 allergen [Blomia tropicalis].	111120432	129
Blomia tropicalis	Blo t 21 allergen [Blomia tropicalis].	111494253	129
Blomia tropicalis	allergen [Blomia tropicalis].	1377859	130
Blomia tropicalis	cysteine protease precursor [Blomia tropicalis].	14276828	221
Blomia tropicalis	paramyosin allergen [Blomia tropicalis].	21954740	875
Blomia tropicalis	trypsin [Blomia tropicalis].	25989482	266
Blomia tropicalis	Blo t 1 allergen [Blomia tropicalis].	33667928	333
Blomia tropicalis	Blo t 3 allergen [Blomia tropicalis].	33667930	266
Blomia tropicalis	Blo t 13 allergen [Blomia tropicalis].	37958153	130
Blomia tropicalis	major IgE-binding protein Blo t 5 [Blomia tropicalis].	4204917	134
Chironomus thummi thummi	Globin CTT-III precursor (Erythrocrurin III).	121219	151
Chironomus thummi thummi	Globin CTT-IV precursor.	121227	151
Chironomus thummi thummi	Globin CTT-VIII.	121237	151
Chironomus thummi thummi	Globin CTT-VIIB-3 precursor.	121244	161
Chironomus thummi thummi	Globin CTT-VIIB-6 precursor.	121248	161
Chironomus thummi thummi	Globin CTT-VIIB-7 precursor.	121249	162
Chironomus thummi thummi	Globin CTT-III A.	121256	151
Chironomus thummi thummi	Globin CTT-X.	121259	151
Chironomus thummi thummi	Globin CTT-II beta precursor.	1707908	160
Chironomus thummi thummi	Globin CTT-I/CTT-IA precursor (Erythrocrurin).	2506460	158

Chironomus thummi thummi	Globin CTT-VI precursor.	2506461	162
Chironomus thummi thummi	Globin CTT-VIIB-4 precursor (Erythrocrucorin).	56405052	161
Chironomus thummi thummi	Globin CTT-VIIB-5/CTT-VIIB-9 precursor.	56405054	161
Chironomus kiiensis	tropomyosin [Chironomus kiiensis].	7321108	285
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	10189811	215
Dermatophagoides pteronyssinus	Der p 7 allergen polypeptide.	1045602	215
Dermatophagoides microceras	Peptidase 1 (Major mite fecal allergen Der m 1) (Allrgen Der m I).	127205	30
Dermatophagoides farinae	Der f 3 mite allergen.	1314736	232
Dermatophagoides pteronyssinus	Alpha-amylase (Allergen Der p 4) (Der p IV).	1351935	19
Dermatophagoides pteronyssinus	Mite group 2 allergen Der p 2 precursor (Der p II) (DPX).	1352237	146
Dermatophagoides pteronyssinus	Mite allergen Der p 5 (Der P V) (IgE-binding allergen).	1352238	132
Dermatophagoides pteronyssinus	Mite allergen Der p 6 (Der p VI) (DP5).	1352239	20
Dermatophagoides farinae	Mag44 [Dermatophagoides farinae].	1359436	299
Dermatophagoides farinae	paramyosin-like allergen [Dermatophagoides farinae].	13785807	692
Dermatophagoides farinae	Mite allergen Der f 6 precursor (Der f VI) (DF5).	14424450	279
Dermatophagoides pteronyssinus	cysteine protease [Dermatophagoides pteronyssinus].	1460058	211
Dermatophagoides farinae	Mag3 [Dermatophagoides farinae].	1545803	349
Dermatophagoides farinae	major Der f 2 isoform [Dermatophagoides farinae].	17978844	129
Dermatophagoides pteronyssinus	group 14 allergen protein [Dermatophagoides pteronyssinus].	20385544	1662
Dermatophagoides pteronyssinus	Chain A, X-Ray Structure Of Der P 2, The Major House Dust Mite	21465915	129
Dermatophagoides farinae	gelsolin-like allergen Der f 16 [Dermatophagoides farinae].	21591547	480
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725560	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725562	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725564	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725566	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725568	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725570	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725572	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725574	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725576	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725578	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725580	222
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725582	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725584	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725586	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725588	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725590	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725592	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725594	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725596	129
Dermatophagoides pteronyssinus	unnamed protein product [Dermatophagoides pteronyssinus].	21725600	129

Cynodon dactylon	Cyn d Ib isoallergen {N-terminal} [Cynodon dactylon=Bermuda grass,	691726	34
Dactylis glomerata	allergen Dac g II.	1093120	196
Dactylis glomerata	group 5 allergen precursor [Dactylis glomerata].	14423124	290
Dactylis glomerata	unnamed protein product [Dactylis glomerata].	18093971	265
Dactylis glomerata	unnamed protein product [Dactylis glomerata].	18093991	264
Dactylis glomerata	Dac gIII allergen.	1825459	96
Dactylis glomerata	Major pollen allergen Dac g 4.	32363463	55
Dactylis glomerata	group 1 allergen Dac g 1.01 precursor [Dactylis glomerata].	33149333	240
Dactylis glomerata	pollen allergen (group II) [Dactylis glomerata].	4007040	122
Festuca arundinacea	pollen allergen Fes e I type A - reed fescue (fragment).	320610	17
Festuca arundinacea	pollen allergen Fes e I type B - reed fescue (fragment).	320611	20
Festuca arundinacea	Group I allergen FeS e I, pollen.	75139991	35
Fraxinus excelsior	allergen Fra e 1.0101 [Fraxinus excelsior].	33327133	145
Fraxinus excelsior	allergen Fra e 1 [Fraxinus excelsior].	34978692	146
Fraxinus excelsior	Fra e 1.0102 major allergen [Fraxinus excelsior].	56122438	145
Holcus lanatus	protein with incomplete signal sequence [Holcus lanatus].	1167836	248
Holcus lanatus	pollen allergen Hol 1 5b [Holcus lanatus].	11991229	296
Holcus lanatus	group V grass pollen allergen [Holcus lanatus].	2266623	240
Holcus lanatus	group V allergen [Holcus lanatus].	2266625	264
Holcus lanatus	major group I allergen Hol 1 I [Holcus lanatus].	3860384	263
Holcus lanatus	allergen Hol-II [Holcus lanatus].	414703	265
Humulus japonicus	Humj1 [Humulus japonicus].	33113263	155
Humulus scandens	profilin-like protein [Humulus scandens].	34851174	131
Humulus scandens	profilin-like protein [Humulus scandens].	34851176	131
Juniperus oxycedrus	putative allergen jun o 1 [Juniperus oxycedrus].	15139849	367
Juniperus rigida	PR5 allergen Jun r 3.1 precursor [Juniperus rigida].	38456222	225
Juniperus rigida	PR5 allergen Jun r 3.2 precursor [Juniperus rigida].	38456224	225
Juniperus ashei	pollen major allergen 1-1 [Juniperus ashei].	4138877	367
Juniperus virginiana	Pathogenesis-related protein precursor (Putative major pollen	51316532	110
Juniperus oxycedrus	pollen allergen Jun o 4 [Juniperus oxycedrus].	5391446	165
Juniperus ashei	allergen Jun a 3 [Juniperus ashei].	6940772	225
Juniperus virginiana	pollen major allergen 1-2 [Juniperus virginiana].	8843917	367
Juniperus virginiana	pollen major allergen 1-1 [Juniperus virginiana].	8843921	367
Juniperus ashei	pollen major allergen 2 protein [Juniperus ashei].	9955725	507
Ligustrum vulgare	major allergen [Ligustrum vulgare].	3256210	145
Ligustrum vulgare	major allergen [Ligustrum vulgare].	3256212	145
Lilium longiflorum	polygalacturonase [Lilium longiflorum].	73913442	413
Lolium perenne	Pollen allergen Lol p 1 precursor (Lol p I) (Allergen R7).	126385	263
Lolium perenne	Pollen allergen Lol p 2-A (Lol p II-A).	126386	97
Lolium perenne	Pollen allergen Lol p 3 (Lol p III).	126387	97
Lolium perenne	pollen allergen.	168314	252
Lolium perenne	Major pollen allergen Lol p 5a precursor (Lol p Va) (Lol p Ib).	2498581	308
Lolium perenne	Major pollen allergen Lol p 5b precursor (Lol p Vb).	2498582	339
Lolium italicum	pollen allergen (group II) [Lolium italicum].	4007636	122
Lolium perenne	pollen allergen Lol p VA precursor; major allergen [Lolium	4416516	301

Lolium perenne	Major pollen allergen Lol p 11 (Lol p XI).	47605808	134
Lolium perenne	pollen allergen Lol p 4 [Lolium perenne].	55859464	423
Lolium perenne	pollen allergen [Lolium perenne].	6634467	301
Lolium perenne	Pollen allergen.	75274600	263
Lolium perenne	allergen Lol p II [Lolium perenne].	939932	88
Mercurialis annua	Profilin [Mercurialis annua].	2959898	133
Olea europaea	Superoxide dismutase [Cu-Zn] (Allergen Ole e 5) (Ole e V).	122064581	30
Olea europaea	main olive allergen [Olea europaea].	13195753	130
Olea europaea	major allergen OLE16 - common olive (fragment).	1362128	137
Olea europaea	major allergen OLE17 - common olive (fragment).	1362129	136
Olea europaea	major allergen OLE19 - common olive (fragment).	1362130	136
Olea europaea	major allergen OLE1c - common olive (fragment).	1362131	145
Olea europaea	major allergen OLE20 - common olive (fragment).	1362132	137
Olea europaea	major allergen OLE26 - common olive (fragment).	1362133	136
Olea europaea	major allergen OLE5c - common olive.	1362136	145
Olea europaea	major allergen OLE6 - common olive (fragment).	1362137	136
Olea europaea	beta-1,3-glucanase-like protein [Olea europaea].	14279169	460
Olea europaea	Pollen allergen Ole e 6.	14423643	50
Olea europaea	Calcium-binding allergen Ole e 8 (PCA18/PCA23).	14423648	171
Olea europaea	Major pollen allergen (Allergen Ole e 1) (Ole e I).	14424429	145
Olea europaea	Pollen allergen Ole e 7 (Ole e VII).	22002032	21
Olea europaea	Ole e 1.0102 protein [Olea europaea].	2465127	146
Olea europaea	Ole e 1.0103 protein [Olea europaea].	2465129	146
Olea europaea	Ole e 1 protein [Olea europaea].	2465131	146
Olea europaea	allergen Ole e 10 [Olea europaea].	29465664	123
Olea europaea	Major pollen allergen Ole e 4 (Ole e IV).	32363447	24
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33325111	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33325115	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329732	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329738	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329744	131
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329748	129
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329750	131
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329752	131
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329754	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329756	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	33329758	131
Olea europaea	calcium-binding pollen allergen [Olea europaea].	3337403	84
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	37548753	132
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	37724593	135
Olea europaea	major pollen allergen Ole e 1 [Olea europaea].	37724597	134
Olea europaea	Ole e 3 allergen [Olea europaea].	37725377	52
Olea europaea	Profilin-1 (Pollen allergen Ole e 2).	3914426	134
Olea europaea	Profilin-2 (Pollen allergen Ole e 2).	3914427	134
Olea europaea	Profilin-3 (Pollen allergen Ole e 2).	3914428	134
Olea europaea	Cu /Zn super-oxide dismutase [Olea europaea].	39840779	152
Olea europaea	calcium-binding protein [Olea europaea].	6901654	171
Parietaria officinalis	mAb 2F9-reactive major allergen {N-terminal} [Parietaria	1311509	17
Parietaria officinalis	mAb 8C7-reactive major allergen {N-terminal, band 1} [Parietaria	1311510	15
Parietaria officinalis	mAb 8C7-reactive major allergen {N-terminal, band 2} [Parietaria	1311511	15
Parietaria officinalis	mAb 3F8-reactive major allergen {N-terminal} [Parietaria	1311512	15
Parietaria officinalis	mAb 8B6-reactive major allergen {N-terminal} [Parietaria	1311513	30
Parietaria judaica	Profilin-2 (Pollen allergen Par j 3.0102).	14423869	131
Parietaria judaica	Profilin-1 (Pollen allergen Par j 3.0101).	14423876	132
Parietaria judaica	P8 protein [Parietaria judaica].	1532056	133
Parietaria judaica	P9 protein [Parietaria judaica].	1532058	176
Parietaria officinalis	Par o 1a=acidic allergen isoform {N-terminal} [Parietaria	1836010	25
Parietaria officinalis	Par o 1b=basic allergen isoform {N-terminal} [Parietaria	1836011	24
Parietaria judaica	Probable non-specific lipid-transfer protein 1 precursor (LTP)	2497749	138
Parietaria judaica	Probable non-specific lipid-transfer protein 2 precursor (LTP 2)	2497750	133
Parietaria judaica	Probable non-specific lipid-transfer protein (LTP) (Major pollen	3915783	139
Parietaria judaica	major allergen Par j I.	741844	143
Parietaria officinalis	Pollen major allergen Par o I.	75139847	12
Phalaris aquatica	Major pollen allergen Pha a 1 precursor (Pha a I).	2498576	269

Phalaris aquatica	Major pollen allergen Pha a 5.1 precursor (Pha A 5) (Clone 28).	2498577	320
Phalaris aquatica	Major pollen allergen Pha a 5.2 precursor (Pha a 5) (Clone 14).	2498578	305
Phalaris aquatica	Major pollen allergen Pha a 5.3 precursor (Pha a 5) (Clone 29).	2498579	294
Phalaris aquatica	Major pollen allergen Pha a 5.4 (Pha a 5) (Clone 5).	2498580	175
Phalaris aquatica	Pha a I=34 kda pollen allergen {N-terminal} [Phalaris	409328	20
Phleum pratense	major allergen Phl p Va.	1092249	285
Phleum pratense	group V allergen Phl p 5 precursor [Phleum pratense].	13430402	275
Phleum pratense	Polcalcin Phl p 7 (Calcium-binding pollen allergen Phl p 7) (P7).	14423846	78
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	1684718	281
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	1684720	276
Phleum pratense	unnamed protein product [Phleum pratense].	21725606	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725608	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725610	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725612	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725614	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725616	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725618	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725620	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725622	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725624	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725626	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725628	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725630	287
Phleum pratense	unnamed protein product [Phleum pratense].	21725632	287
Phleum pratense	pollen allergen Phl p 11 [Phleum pratense].	23452313	143
Phleum pratense	Major Pollen Allergen Phl p Va [Phleum pratense].	2398757	286
Phleum pratense	profilin 3 [Phleum pratense].	2415700	131
Phleum pratense	profilin 4 [Phleum pratense].	2415702	131
Phleum pratense	Chain A, Crystal Structure Of Phl P 1, A Major Timothy Grass Pollen	28373838	241
Phleum pratense	Chain N, Crystal Structure Of Phl P 6, A Major Timothy Grass Pollen	28374072	111
Phleum pratense	Pollen allergen Phl p 5b precursor (Phl p Vb).	2851457	284
Phleum pratense	Chain A, Crystal Structure Of The Functional Domain Of The Major	28948464	102
Phleum pratense	phl p5a allergen precursor [Phleum pratense].	29500897	284
Phleum pratense	Phl p6 allergen [Phleum pratense].	3004465	138
Phleum pratense	Phl p6 allergen [Phleum pratense].	3004467	138
Phleum pratense	Phl p6 IgE binding fragment [Phleum pratense].	3004469	106
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	3135497	276
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	3135499	276
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	3135501	276
Phleum pratense	major allergen Phl p 5 [Phleum pratense].	3135503	276
Phleum pratense	group V allergen Phl p 5.0103 precursor [Phleum pratense].	3309039	312
Phleum pratense	group V allergen Phl p 5.0203 precursor [Phleum pratense].	3309041	295
Phleum pratense	group V allergen Phl p 5.0206 precursor [Phleum pratense].	3309045	290
Phleum pratense	group V allergen Phl p 5.0207 precursor [Phleum pratense].	3309047	287
Phleum pratense	pollen allergen Phl pI [Phleum pratense].	3901094	263
Phleum pratense	Phlp5 [Phleum pratense].	398830	312
Phleum pratense	PHL PII, pollen allergen [Phleum pratense].	415896	122
Phleum pratense	PHLP5A protein - common timothy (fragment).	422005	257
Phleum pratense	unnamed protein product [Phleum pratense].	45108967	500
Phleum pratense	unnamed protein product [Phleum pratense].	45108973	500
Phleum pratense	unnamed protein product [Phleum pratense].	45823012	240
Phleum pratense	Profilin-1 (Pollen allergen Phl p 12) (Phl p 11).	464471	131
Phleum pratense	Phl p I allergen [Phleum pratense].	473360	263
Phleum pratense	allergen Phl p Vb - common timothy.	481397	280
Phleum pratense	polygalacturonase [Phleum pratense].	4826572	394
Phleum pratense	pollen allergen Phl p 4 [Phleum pratense].	54144332	508
Phleum pratense	Pollen allergen Phl p V.	75139900	24
Phleum pratense	major pollen allergen Phl p 4 precursor [Phleum pratense].	82492267	525
Phoenix dactylifera	profilin [Phoenix dactylifera].	21322677	131
Platanus x acerifolia	putative invertase inhibitor precursor [Platanus x acerifolia].	26190140	179
Platanus x acerifolia	polygalacturonase [Platanus x acerifolia].	49523394	377
Poa pratensis	Pollen allergen KBG 31 precursor (Pollen allergen Poa p 9) (Poa p	113560	373
Poa pratensis	Pollen allergen KBG 41 precursor (Pollen allergen Poa p 9) (Poa p	113561	333
Poa pratensis	Pollen allergen KBG 60 precursor (Pollen allergen Poa p 9) (Poa p	113562	307

Poa pratensis	pollen allergen Poa p 5 [Poa pratensis].	11991227	303
Poa pratensis	pollen allergen Poa-pI - Kentucky bluegrass (fragment).	280414	20
Poa pratensis	pollen allergen Poa p I - Kentucky bluegrass (fragment).	320620	26
Poa pratensis	pollen allergen (group II) [Poa pratensis].	4007655	122
Poa pratensis	group I pollen allergen [Poa pratensis].	4090265	263
Poa pratensis	pollen allergen (clone 7.2) - Kentucky bluegrass (fragment).	539056	131
Quercus alba	major pollen allergen Que a I - white oak (fragment).	543675	24
Salsola kali	Pollen allergen Sal k 1.	25090947	42
Salsola kali	pectin-methyltransferase precursor [Salsola kali].	51242679	362
Salsola kali	pectin methylesterase allergenic protein [Salsola kali].	59895728	339
Salsola kali	pectin methylesterase allergenic protein [Salsola kali].	59895730	339
Syringa vulgaris	allergen-like protein Syr v I isoform 1 - Syringa vulgaris.	631911	145
Syringa vulgaris	allergen-like protein Syr v I isoform 2 - Syringa vulgaris.	631912	145
Syringa vulgaris	allergen-like protein Syr v I isoform 3 - Syringa vulgaris.	631913	145

### Food Allergens Animals

Species	Comments	GI #	AA
Batillus cornutus	Tropomyosin (Major allergen Tur c 1).	47117349	146
Bos taurus	kappa-casein [Bos taurus].	1228078	190
Bos taurus	alpha-lactalbumin precursor (EC 2.4.1.22).	162644	142
Bos taurus	albumin [Bos taurus].	162648	607
Bos taurus	alpha-s1-casein.	162650	93
Bos taurus	beta-lactoglobulin.	162748	151
Bos taurus	beta-lactoglobulin.	162750	14
Bos taurus	alpha-s1-casein precursor.	162792	214
Bos taurus	alpha-S1-casein.	162794	214
Bos taurus	beta-casein precursor.	162797	224
Bos taurus	beta-casein.	162805	224
Bos taurus	kappa-casein precursor.	162811	190
Bos taurus	alpha-s1-casein.	162927	76
Bos taurus	alpha-s2-like casein precursor.	162929	222
Bos taurus	beta-casein precursor.	162931	224
Bos taurus	Protein S100-A7 (S100 calcium-binding protein A7) (Allergen Bos d	2493414	101
Bos taurus	alpha-lactalbumin [Bos taurus].	295774	142
Bos taurus	lactotransferrin [Bos taurus].	30794292	708
Bos taurus	bovine serum albumin [Bos taurus].	3336842	607
Bos taurus	beta-casein A3 [Bos taurus].	459292	224
Bos taurus	beta-lactoglobulin [Bos taurus].	520	178
Bos taurus	beta-lactoglobulin variant B precursor [Bos taurus].	669061	178
Bos taurus	major allergen BDA20 [Bos taurus].	886215	172
Charybdis feriatius	heat stable allergen tropomyosin [Charybdis feriatius].	7024506	264
Chionoecetes opilio	tropomyosin slow-tonic isoform [Chionoecetes opilio].	125995167	284
Crassostrea gigas	tropomyosin [Crassostrea gigas].	15419048	233
Cyprinus carpio	parvalbumin [Cyprinus carpio].	17977825	109
Cyprinus carpio	parvalbumin [Cyprinus carpio].	17977827	109
Erimacrus isenbeckii	tropomyosin slow-twitch isoform [Erimacrus isenbeckii].	125995169	284
Erimacrus isenbeckii	tropomyosin slow-tonic isoform [Erimacrus isenbeckii].	125995171	284
Farfantepenaeus aztecus	Pen a 1 allergen [Farfantepenaeus aztecus].	73532979	284
Gadus callarias	Parvalbumin beta (Allergen Gad c 1) (Gad c I) (Allergen M).	131112	113
Gadus morhua	parvalbumin beta [Gadus morhua].	14531014	109
Gadus morhua	parvalbumin beta [Gadus morhua].	14531016	109
Gallus gallus	PREDICTED: similar to Ovomuroid precursor (Allergen Gal d 1) (Gal d	118097409	208
Gallus gallus	Ovomucoid precursor (Allergen Gal d 1) (Allergen Gal d I).	124757	210
Gallus gallus	Lysozyme C precursor (1,4-beta-N-acetylmuramidase C) (Allergen Gal	126608	147
Gallus gallus	Ovalbumin (Egg albumin) (Plakalbumin) (Allergen Gal d 2) (Allergen	129293	386
Gallus gallus	Ovotransferrin precursor (Conalbumin) (Serum transferrin) (Allergen	1351295	705
Gallus gallus	Chain A, Loop-Inserted Structure Of P1-P1' Cleaved Ovalbumin Mutant	15826578	385
Gallus gallus	lysozyme protein.	212279	24
Gallus gallus	Chain D, Crystal Structure Of S-Ovalbumin At 1.9 Angstrom	34811333	385
Gallus gallus	unnamed protein product [Gallus gallus].	63052	155
Gallus gallus	preproalbumin (serum albumin) [Gallus gallus].	63748	615
Gallus gallus	ovotransferrin [Gallus gallus].	757851	705
Gallus gallus	unnamed protein product [Gallus gallus].	808969	386
Helix aspersa	tropomyosin [Helix aspersa].	4468224	284

Homarus americanus	Tropomyosin (Allergen Hom a 1).	14285796	284
Homarus americanus	fast tropomyosin isoform [Homarus americanus].	2660868	284
Litopenaeus vannamei	arginine kinase [Litopenaeus vannamei].	115492980	356
Marsupenaeus japonicus	tropomyosin fast isoform [Marsupenaeus japonicus].	125995159	284
Metapenaeus ensis	tropomyosin.	607633	274
Mimachlamys nobilis	tropomyosin [Mimachlamys nobilis].	9954253	284
Octopus vulgaris	tropomyosin [Octopus vulgaris].	83715936	284
Ommastrephes bartramii	tropomyosin [Ommastrephes bartramii].	83715934	284
Pandalus eous	tropomyosin fast isoform [Pandalus eous].	125995161	284
Panulirus stimpsoni	Tropomyosin (Allergen Pan s 1) (Pan s I).	14285797	274
Paralithodes camtschaticus	tropomyosin fast isoform [Paralithodes camtschaticus].	125995163	284
Paralithodes camtschaticus	tropomyosin slow-tonic isoform [Paralithodes camtschaticus].	125995165	284
Penaeus monodon	tropomyosin fast isoform [Penaeus monodon].	125995157	284
Penaeus monodon	allergen Pen m 2 [Penaeus monodon].	27463265	356
Perna viridis	tropomyosin [Perna viridis].	9954251	284
Rana esculenta	parvalbumin alpha [Rana esculenta].	20796729	110
Rana sp. CH-2001	parvalbumin alpha [Rana sp. CH-2001].	20796733	110
Rana esculenta	parvalbumin beta protein [Rana esculenta].	20797081	109
Rana sp. CH-2001	parvalbumin beta protein [Rana sp. CH-2001].	20797085	109
Salmo salar	Parvalbumin beta 2 (Major allergen Sal s 1).	18281421	108
Salmo salar	Parvalbumin beta 1 (Major allergen Sal s 1).	2493445	109
Sepia esculenta	tropomyosin [Sepia esculenta].	83715928	284
Sepioteuthis lessoniana	tropomyosin [Sepioteuthis lessoniana].	83715930	284
Theragra chalcogramma	parvalbumin [Theragra chalcogramma].	14531018	109
Theragra chalcogramma	parvalbumin [Theragra chalcogramma].	14531020	109
Todarodes pacificus	tropomyosin [Todarodes pacificus].	83715932	284
Trachurus japonicus	dark muscle parvalbumin [Trachurus japonicus].	77799800	107

## Food Allergens Plants

Species	Comments	GI #	AA
Actinidia deliciosa	unnamed protein product [Actinidia deliciosa].	15984	380
Actinidia deliciosa	actinidin.	166317	380
Actinidia deliciosa	phytolectin [Actinidia deliciosa].	40807635	116
Actinidia chinensis	Thaumatococin-like protein (Allergen Act c 2).	68064399	20
Actinidia deliciosa	thaumatococin-like protein [Actinidia deliciosa].	71057064	225
Actinidia deliciosa	Kiwellin (Allergen Act d 5).	85701136	189
Anacardium occidentale	vicilin-like protein [Anacardium occidentale].	21666498	536
Anacardium occidentale	vicilin-like protein [Anacardium occidentale].	21914823	538
Anacardium occidentale	2s albumin [Anacardium occidentale].	24473800	138
Anacardium occidentale	allergen Ana o 2 [Anacardium occidentale].	25991543	457
Ananas comosus	profilin [Ananas comosus].	14161637	131
Ananas comosus	Fruit bromelain precursor (Allergen Ana c 2).	75277440	351
Apium graveolens	Major allergen Api g 1 (Api g 1.0101) (Allergen Api g I).	1346568	154
Apium graveolens	Api g 1.0201 allergen [Apium graveolens].	1769847	159
Apium graveolens	Allergen Api g 5.	33300920	86
Apium graveolens	profilin [Apium graveolens].	4761578	134
Arachis hypogaea	iso-Ara h3 [Arachis hypogaea].	112380623	512
Arachis hypogaea	Allergen Ara h 1, clone P17 precursor (Ara h I).	1168390	614
Arachis hypogaea	Allergen Ara h 1, clone P41B precursor (Ara h I).	1168391	626
Arachis hypogaea	unnamed protein product [Arachis hypogaea].	14347293	207
Arachis hypogaea	Chain A, Allergen Ara h 6 From Peanut (Arachis Hypogaea).	159163254	127
Arachis hypogaea	conglutin [Arachis hypogaea].	17225991	144
Arachis hypogaea	allergen Ara h 3/Ara h 4 [Arachis hypogaea].	21314465	538
Arachis hypogaea	trypsin inhibitor [Arachis hypogaea].	22135348	219
Arachis hypogaea	peanut agglutinin precursor; prePNA [Arachis hypogaea].	253289	273
Arachis hypogaea	allergen Ara h 2.02 [Arachis hypogaea].	26245447	172
Arachis hypogaea	allergen Ara h 2 isoform [Arachis hypogaea].	31322017	169
Arachis hypogaea	glycinin [Arachis hypogaea].	3703107	507
Arachis hypogaea	Ara h 8 allergen [Arachis hypogaea].	37499626	157
Arachis hypogaea	conarachin [Arachis hypogaea].	46560472	303
Arachis hypogaea	conarachin [Arachis hypogaea].	46560474	299
Arachis hypogaea	conarachin [Arachis hypogaea].	46560476	428
Arachis hypogaea	glycinin [Arachis hypogaea].	5712199	530
Arachis hypogaea	profilin [Arachis hypogaea].	5902968	131

Arachis hypogaea	allergen Ara h 6 [Arachis hypogaea].	5923742	129
Arachis hypogaea	allergen [Arachis hypogaea].	5931948	160
Bertholletia excelsa	2S sulfur-rich seed storage protein precursor (Allergen Ber e 1)	112754	146
Bertholletia excelsa	2S albumin [Bertholletia excelsa].	17713	154
Bertholletia excelsa	11S globulin [Bertholletia excelsa].	30313867	465
Brassica napus	pollen allergen group II (clone 42) - rape.	2129801	83
Brassica napus	pollen allergen group II (clone 44) - rape.	2129802	83
Brassica rapa	pollen allergen group II (clone 4) - turnip (fragment).	2129805	80
Brassica napus	recombinant 1b pronapin precursor [Brassica napus].	26985163	109
Brassica rapa subsp. rapa	Chitin-binding allergen Bra r 2.	32363456	91
Brassica juncea	Bra j IE small chain=allergen [Brassica juncea=oriental-mustard,	407609	37
Brassica juncea	Bra j IE large chain=allergen [Brassica juncea=oriental-mustard,	407610	92
Brassica rapa subsp. rapa	Polcalcin Bra r 1 (Calcium-binding pollen allergen Bra r 1).	59800144	79
Brassica rapa subsp. rapa	Polcalcin Bra r 2 (Calcium-binding pollen allergen Bra r 2).	59800146	83
Capsicum annuum	profilin [Capsicum annuum].	16555785	131
Carica papaya	papain precursor.	167391	345
Castanea sativa	chitinase 1b [Castanea sativa].	1359600	316
Castanea sativa	ypr10 [Castanea sativa].	16555781	160
Castanea sativa	CAS S 1 major allergen.	75199059	24
Citrus sinensis	lipid transfer protein [Citrus sinensis].	50199132	91
Citrus sinensis	Germin-like protein (Allergen Cit s 1).	52782810	25
Citrus limon	Non-specific lipid-transfer protein (LTP) (Allergen Cit 13).	52783176	20
Citrus sinensis	Non-specific lipid-transfer protein (LTP) (Allergen Cit s 3.0101).	52783177	20
Citrus sinensis	Profilin (Allergen Cit s 2).	54036219	10
Citrus sinensis	profilin [Citrus sinensis].	56000996	131
Corylus avellana	putative luminal binding protein [Corylus avellana].	10944737	668
Corylus avellana	major allergen variant Cor a 1.0402 [Corylus avellana].	11762102	161
Corylus avellana	major allergen variant Cor a 1.0403 [Corylus avellana].	11762104	161
Corylus avellana	major allergen variant Cor a 1.0404 [Corylus avellana].	11762106	161
Corylus avellana	minor allergen hazelnut profilin [Corylus avellana].	12659206	131
Corylus avellana	minor allergen hazelnut profilin [Corylus avellana].	12659208	131
Corylus avellana	major allergen Cor a 1 [Corylus avellana].	1321731	160
Corylus avellana	major allergen Cor a 1 [Corylus avellana].	1321733	160
Corylus avellana	lipid transfer protein precursor [Corylus avellana].	13507262	115
Corylus avellana	11S globulin-like protein [Corylus avellana].	18479082	515
Corylus avellana	48-kDa glycoprotein precursor [Corylus avellana].	19338630	448
Corylus avellana	major allergen [Corylus avellana].	22684	160
Corylus avellana	major allergen [Corylus avellana].	22686	160
Corylus avellana	major allergen [Corylus avellana].	22690	160
Corylus avellana	oleosin [Corylus avellana].	29170509	140
Corylus avellana	major allergen Cor a 1.0401 [Corylus avellana].	5726304	161
Corylus avellana	Major pollen allergen Cor a 1 isoforms 5, 6, 11 and 16 (Allergen	584968	160
Cucumis melo	profilin [Cucumis melo].	31559374	131
Cucumis melo	Pathogenesis-related protein (PR-1) (Allergen Cuc m 3).	46396595	41
Cucumis melo var. cantalupensis	profilin [Cucumis melo var. reticulatus].	57021110	131
Cucumis melo	profilin [Cucumis melo].	58263793	131
Cucumis melo	pre-pro-cucumis [Cucumis melo].	807698	731
Daucus carota	pathogenesis-related protein.	1335877	168
Daucus carota	cr16 [Daucus carota].	1663522	154
Daucus carota	major allergen isoform Dau c 1.0201 [Daucus carota].	18652047	154
Daucus carota	minor allergen Dau c 4 profilin [Daucus carota].	18652049	134
Daucus carota	pathogenesis-related protein-like protein 1 [Daucus carota].	19912791	154
Daucus carota	major allergen [Daucus carota].	2154732	154
Daucus carota	major allergen [Daucus carota].	2154734	154
Daucus carota	major allergen Dau c 1/1 [Daucus carota].	2154736	154
Fagopyrum tataricum	BW10KD allergen protein [Fagopyrum tataricum].	144228127	133
Fagopyrum esculentum	BW8KD allergen protein [Fagopyrum esculentum].	17907758	133
Fagopyrum tataricum	allergenic protein [Fagopyrum tataricum].	22353013	195
Fagopyrum esculentum	legumin-like protein [Fagopyrum esculentum].	2317670	565
Fagopyrum esculentum	legumin-like protein [Fagopyrum esculentum].	2317674	504
Fagopyrum esculentum	major allergenic storage protein [Fagopyrum esculentum].	4895075	538
Fagopyrum esculentum	BW 16kDa allergen [Fagopyrum esculentum].	61970231	127
Fagopyrum gracilipes	22kDa storage protein [Fagopyrum gracilipes].	6979766	191
Fagopyrum esculentum	16 kDa allergen [Fagopyrum esculentum].	83416591	149

Fragaria x ananassa	Allergen Fra a 1.	60389902	100
Fragaria x ananassa	Fra a 1-A allergen [Fragaria x ananassa].	88082485	160
Fragaria x ananassa	Major strawberry allergen Fra a 1-B [Fragaria x ananassa].	90185682	160
Fragaria x ananassa	Major strawberry allergen Fra a 1-D [Fragaria x ananassa].	90185684	160
Fragaria x ananassa	Major strawberry allergen Fra a 1-C [Fragaria x ananassa].	90185688	159
Fragaria x ananassa	Major strawberry allergen Fra a 1-E [Fragaria x ananassa].	90185692	160
Glycine max	34 kDa maturing seed vacuolar thiol protease precursor [Glycine	1199563	379
Glycine max	allergen Gly m Bd 28K [Glycine max].	12697782	473
Glycine max	P34 probable thiol protease precursor.	129353	379
Glycine max	hull allergen Gly m 2 - soybean (fragment).	1362049	20
Glycine max	beta-conglycinin-alpha subunit.	169927	218
Glycine max	beta-conglycinin storage protein [Glycine max].	169929	639
Glycine max	glycinin.	169969	516
Glycine max	glycinin precursor.	169971	240
Glycine max	unnamed protein product [Glycine max].	18536	605
Glycine max	unnamed protein product [Glycine max].	18609	485
Glycine max	unnamed protein product [Glycine max].	18615	495
Glycine max	glycinin subunit G1 [Glycine max].	18635	495
Glycine max	glycinin subunit G2 [Glycine max].	18637	485
Glycine max	glycinin subunit G3 [Glycine max].	18639	481
Glycine max	glycinin [Glycine max].	18641	562
Glycine max	unnamed protein product [Glycine max].	18744	158
Glycine max	trypsin inhibitor subtype A [Glycine max].	18770	217
Glycine max	trypsin inhibitor subtype B [Glycine max].	18772	217
Glycine max	CG4 beta-conglycinin [Glycine max].	256427	439
Glycine max	Kunitz trypsin inhibitor; KTi [Glycine max].	256429	216
Glycine max	Kunitz trypsin inhibitor KTi1 [Glycine max].	256635	203
Glycine max	Kunitz trypsin inhibitor KTi2 [Glycine max].	256636	204
Glycine max	profilin [Glycine max].	3021373	131
Glycine max	Bd 30K [Glycine max].	3097321	379
Glycine max	Profilin-1 (GmPRO1) (Allergen Gly m 3.0101).	3914435	131
Glycine max	Kunitz trypsin inhibitor [Glycine max].	510515	208
Glycine max	unnamed protein product [Glycine max].	732706	562
Glycine soja	Gy5 [Glycine soja].	736002	517
Glycine max	hydrophobic seed protein precursor-like [Glycine max].	76782247	134
Glycine max	hydrophobic seed protein precursor [Glycine max].	76782249	119
Glycine soja	A5A4B3 subunit [Glycine soja].	806556	563
Glycine max	Major Gly 50 kDa allergen.	85681057	17
Glycine max	Gly m IA allergen, HPS=hydrophobic seed protein {N-terminal}	999355	42
Helianthus annuus	pre-pro-seed albumin [Helianthus annuus].	18821	141
Helianthus annuus	profilin [Helianthus annuus].	3581965	133
Hordeum vulgare	trypsin inhibitor cme precursor [Hordeum vulgare].	1405736	144
Hordeum vulgare	amylase/protease inhibitor.	167077	117
Hordeum vulgare subsp. vulgare	alpha-amylase inhibitor [Hordeum vulgare subsp. vulgare].	18955	144
Hordeum vulgare subsp. vulgare	CMe [Hordeum vulgare subsp. vulgare].	19009	148
Hordeum vulgare	LTP 1 [Hordeum vulgare].	19039	134
Hordeum vulgare	Alpha-amylase inhibitor BMAI-1 precursor (Allergen Hor v 1)	2506771	146
Hordeum vulgare subsp. vulgare	BDAI-1; Barley dimeric alpha-amylase inhibitor [Hordeum vulgare	3367714	152
Hordeum vulgare subsp. vulgare	CMa, component of tetrameric alpha-amylase inhibitor [Hordeum	439275	145
Hordeum vulgare	Alpha-amylase/trypsin inhibitor CMb precursor	585290	149
Juglans regia	albumin seed storage protein precursor [Juglans regia].	1794252	139
Juglans nigra	2S albumin seed storage protein [Juglans nigra].	31321942	161
Juglans nigra	vicilin seed storage protein [Juglans nigra].	31321944	481
Juglans regia	seed storage protein [Juglans regia].	56788031	507
Juglans regia	vicilin-like protein precursor [Juglans regia].	6580762	593
Lens culinaris	allergen Len c 1.0101 [Lens culinaris].	29539109	418
Lens culinaris	allergen Len c 1.0102 [Lens culinaris].	29539111	415
Litchi chinensis	profilin [Litchi chinensis].	15809696	131
Litchi chinensis	profilin [Litchi chinensis].	83317152	131
Malus x domestica	major allergen {N-terminal} [apples, Golden Delicious, Peptide	1174276	37
Malus x domestica	major allergen Mal d 1 [Malus x domestica].	1313966	159
Malus x domestica	major allergen Mal d 1 [Malus x domestica].	1313968	160
Malus x domestica	major allergen Mal d1 [Malus x domestica].	1313970	160
Malus x domestica	major allergen Mal d1 [Malus x domestica].	1313972	160

Malus x domestica	Major allergen Mal d 1 (Allergen Mal d I).	1346478	159
Malus x domestica	Profilin-1 (GD4-1) (Pollen allergen Mal d 4.0301).	14423873	131
Malus x domestica	Profilin-2 (GD4-2) (Pollen allergen Mal d 4.0201).	14423874	131
Malus x domestica	Profilin-3 (GD4-5) (Pollen allergen Mal d 4.0101).	14423875	131
Malus x domestica	18 kda major allergen/Bet v 1 homolog {N-terminal} [Malus	1478292	25
Malus x domestica	31 kda major allergen/disease resistance protein homolog	1478293	26
Malus x domestica	ypr10 [Malus x domestica].	16555783	159
Malus x domestica	major allergen d 1 [Malus x domestica].	21685277	158
Malus x domestica	major allergen Mal d 1 [Malus x domestica].	2443824	159
Malus x domestica	major allergen Mal d 1 [Malus x domestica].	27922941	159
Malus x domestica	profilin [Malus x domestica].	28881453	131
Malus x domestica	profilin [Malus x domestica].	28881455	131
Malus x domestica	profilin [Malus x domestica].	28881457	131
Malus x domestica	Thaumatococcus-like protein 1a precursor (Allergen Mal d 2) (Mdt1)	30316292	246
Malus x domestica	allergen Mal d 3 [Malus x domestica].	38492338	115
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590364	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590366	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590368	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590376	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590380	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590382	159
Malus x domestica	major allergen mal d 1 [Malus x domestica].	4590388	159
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	50659859	115
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	50659879	115
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	50659885	115
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	50659889	115
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	50659891	115
Malus x domestica	major allergen Mal d 1.02 [Malus x domestica].	60280797	159
Malus x domestica	major allergen Mal d 1.04 [Malus x domestica].	60280803	160
Malus x domestica	major allergen Mal d 1.0501 [Malus x domestica].	60280807	160
Malus x domestica	major allergen Mal d 1.0502 [Malus x domestica].	60280809	160
Malus x domestica	major allergen Mal d 1.06A02 [Malus x domestica].	60280811	159
Malus x domestica	major allergen Mal d 1.06A01 [Malus x domestica].	60280815	159
Malus x domestica	major allergen Mal d 1.06B [Malus x domestica].	60280817	159
Malus x domestica	major allergen Mal d 1.06B [Malus x domestica].	60280819	159
Malus x domestica	major allergen Mal d 1.06B [Malus x domestica].	60280821	159
Malus x domestica	major allergen Mal d 1.06C [Malus x domestica].	60280823	159
Malus x domestica	major allergen Mal d 1.06C [Malus x domestica].	60280825	159
Malus x domestica	major allergen Mal d 1.06C [Malus x domestica].	60280827	159
Malus x domestica	major allergen Mal d 1.07 [Malus x domestica].	60280829	159
Malus x domestica	major allergen Mal d 1.07 [Malus x domestica].	60280831	159
Malus x domestica	major allergen Mal d 1.08 [Malus x domestica].	60280837	159
Malus x domestica	major allergen Mal d 1.09 [Malus x domestica].	60280839	159
Malus x domestica	major allergen Mal d 1.03A [Malus x domestica].	60280841	159
Malus x domestica	major allergen Mal d 1.03B [Malus x domestica].	60280843	159
Malus x domestica	major allergen Mal d 1.03C [Malus x domestica].	60280847	159
Malus x domestica	major allergen Mal d 1.03D [Malus x domestica].	60280849	159
Malus x domestica	major allergen Mal d 1.03D [Malus x domestica].	60280851	159
Malus x domestica	major allergen Mal d 1.03E [Malus x domestica].	60280853	159
Malus x domestica	major allergen Mal d 1.03E [Malus x domestica].	60280855	159
Malus x domestica	major allergen Mal d 1.03F [Malus x domestica].	60280859	159
Malus x domestica	major allergen Mal d 1.03F [Malus x domestica].	60280861	159
Malus x domestica	major allergen Mal d 1.03G [Malus x domestica].	60280863	159
Malus x domestica	thaumatin-like protein precursor [Malus x domestica].	60418842	246
Malus x domestica	thaumatin-like protein precursor [Malus x domestica].	60418848	246
Malus x domestica	profilin 1 [Malus x domestica].	60418854	131
Malus x domestica	profilin 1 [Malus x domestica].	60418858	131
Malus x domestica	profilin 2 [Malus x domestica].	60418862	131
Malus x domestica	profilin 2 [Malus x domestica].	60418866	131
Malus x domestica	Mal d 1.0105 [Malus x domestica].	60460572	159
Malus x domestica	lipid transfer protein precursor [Malus x domestica].	6715522	115
Musa acuminata	profilin [Musa acuminata].	14161635	131
Oryza sativa Japonica Group	Seed allergenic protein RAG1 precursor (Seed allergenic protein	114152864	163
Oryza sativa Japonica Group	Seed allergenic protein RAG2 precursor (Seed allergenic protein	114152865	166

Oryza sativa	Ory s 1.	1173557	263
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1304216	111
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1304217	109
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1304218	113
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1398913	166
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1398915	160
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1398916	157
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	1398918	160
Oryza sativa Japonica Group	glyoxalase I [Oryza sativa (japonica cultivar-group)].	16580747	291
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	218193	165
Oryza sativa Japonica Group	allergenic protein [Oryza sativa (japonica cultivar-group)].	218195	162

Regulatory Product Characterization Team

Smith-Waterman score: 7777; 98.812% identity (99.236% similar) in 1178 aa overlap (5-1182:1-1177)

Sequence alignment for Cry1Ac and gi|682. The alignment shows high identity between the two sequences, with positions 10-60, 70-120, 130-180, 190-240, 250-300, 310-360, 370-420, 430-480, 490-540, and 550-600 aligned. The sequences are: Cry1Ac CMQAMDNNPNINCEIPYNCLSNPEVEVLGGERIETGYTPIDISLSLTQFLLESEFVPGAGF... and gi|682 MDNNPNINCEIPYNCLSNPEVEVLGGERIETGYTPIDISLSLTQFLLESEFVPGAGF...

Continuation of sequence alignment for Cry1Ac and gi|682. The alignment shows high identity between the two sequences, with positions 540-590, 600-660, 670-720, 730-780, 790-840, 850-900, 910-960, 970-1020, 1030-1080, 1090-1140, and 1150-1180 aligned. The sequences are: Cry1Ac GVIIDRFEPFIPVTATLEAEYNLERAQKAVNALFTSTNQLGLKTNVTDYHIDQVSNLVTYL... and gi|682 GVIIDRFEPFIPVTATLEAEYNLERAQKAVNALFTSTNQLGLKTNVTDYHIDQVSNLVTCL...

```

Regulatory Product Characterization Team

Smith-Waterman score: 5519; 88.291% identity (93.882% similar) in 948 aa overlap (5-948:1-943)

Sequence alignment for Cry1Ac and gi|911. Includes residue numbers 10-60, 70-120, 130-180, 190-240, 250-300, 310-360, 370-420, 430-480, 490-530, 540-590. Shows high identity between the two sequences.

Sequence alignment for Cry1Ac and gi|597. Includes residue numbers 600-650, 660-710, 720-770, 780-830, 840-890, 900-950, 960-1010, 1020-1070. Shows lower identity compared to the gi|911 alignment.

Regulatory Product Characterization Team

Smith-Waterman score: 5265; 68.099% identity (83.058% similar) in 1210 aa overlap (5-1182:1-1189)

Sequence alignment for Cry1Ac vs gi|233. Includes residue numbers (10-60, 70-120, 130-180, 190-240, 250-290, 300-350, 360-400, 410-460, 470-520, 530-580) and amino acid sequences for both proteins.

Sequence alignment for Cry1Ac vs gi|233. Includes residue numbers (520-570, 590-630, 640-690, 700-750, 760-810, 820-870, 880-930, 940-990, 1000-1050, 1060-1100, 1110-1160) and amino acid sequences for both proteins.

Regulatory Product Characterization Team

Smith-Waterman score: 5259; 68.017% identity (82.893% similar) in 1210 aa overlap (5-1182:1-1189)

Sequence alignment for Cry1Ac and gi|627. The alignment shows amino acid sequences with positions 10-60, 70-120, 130-180, 190-240, 250-300, 310-360, 370-420, 430-480, 490-540, 550-600. The sequences are highly conserved, with only a few substitutions noted.

Sequence alignment for Cry1Ac and gi|627. The alignment shows amino acid sequences with positions 520-570, 590-640, 650-700, 710-760, 770-820, 830-880, 890-940, 950-1000, 1010-1060, 1070-1120, 1130-1180. The sequences are highly conserved, with only a few substitutions noted.
