Regulatory Product Characterization Team

Smith-Waterman score: 1776; 48.226% identity (73.548% similar) in 620 aa overlap (5-617:1-605)

Sequence alignment for Cry1Ac vs gi|151. Includes residue numbers 10-60, 70-120, 130-180, 190-240, 250-290, 300-350, 360-410, 420-470, 480-530, 540-590. Shows high identity between the two sequences.

Sequence alignment for Cry1Ac vs gi|341. Includes residue numbers 530-580, 600-650, 590-600, 10-50, 60-110, 120-170, 180-230, 240-290, 300-350, 360-410, 420-470, 480-530. Shows lower identity compared to gi|151.

Regulatory Product Characterization Team

Smith-Waterman score: 1916; 33.415% identity (60.163% similar) in 1230 aa overlap (5-1182:26-1156)

Sequence alignment for Cry1Ac (1-1182) and gi|402 (5-1156). The alignment shows high identity between the two sequences, with gaps indicated by dashes. Residue positions are marked at intervals of 10.

Sequence alignment for Cry1Ac (510-1156) and gi|402 (510-1156). This section shows the alignment of the C-terminal region of the protein, with residue positions marked at intervals of 10.

Regulatory Product Characterization Team

Smith-Waterman score: 1091; 34.300% identity (66.894% similar) in 586 aa overlap (55-612:82-650)

Sequence alignment for Cry1Ac vs gi|401. Includes residue numbers 30-70, 80-130, 140-190, 200-250, 260-310, 320-360, 370-420, 430-480, 490-540, 540-590.

Sequence alignment for gi|401 vs Cry1Ac. Includes residue numbers 580-630, 600-650.

initn: 1129 init1: 505 opt: 858 Z-score: 1004.4 bits: 197.0 E(): 5e-47

Regulatory Product Characterization Team

Smith-Waterman score: 1236; 37.855% identity (66.719% similar) in 634 aa overlap (22-619:59-673)

Sequence alignment for gi|252 vs Cry1Ac. Shows amino acid sequences with positions 10-50, 60-110, 120-170, 180-220, 230-280, 290-330, 340-380, 390-440, 450-500, 510-560. Includes gaps and alignment markers.

Sequence alignment for gi|252 vs Cry1Ac. Shows amino acid sequences with positions 560-600, 570-610, 620-660, 670. Includes gaps and alignment markers.

Regulatory Product Characterization Team

Smith-Waterman score: 203; 19.516% identity (51.452% similar) in 620 aa overlap (34-601:25-618)

Sequence alignment for Cry1Ac vs gi|216. Shows amino acid sequences with positions 10-50, 60-110, 120-170, 180-220, 230-280, 290-340, 350-400, 410-450, 460-510, 520-550. Includes labels like Cry1Ac and gi|216.

Sequence alignment for Cry1Ac vs gi|592. Shows amino acid sequences with positions 520-570, 580-610, 620-670, 680-710, 720-750, 760-810, 820-870, 880-910, 920-950. Includes labels like Cry1Ac and gi|592. Also contains a reference sequence header: >>gi|592275|gb|AAA53882.1| Sequence 2 from Patent WO 890 (643 aa)...
