

25/11/12

A 1073 - Food derived from Herbicide-Tolerant Soybean DAS-44406-6.

I oppose the above application and request that permission be denied.

Reason:

All the potential allergenicity and toxicity studies on Soybean DAS-44406-6 have been done "in house" by Dow Agrosciences, are unpublished, and have not apparently been peer-reviewed.

Therefore, the studies have not been conducted "at arm's length" and lack credibility.

Only published and peer-reviewed toxicity and allergenicity studies can be acceptable.

Paul Elwell-Sutton
