- 9. Phone:** [REDACTED]
- 10. Fax:**
- 11. Email Address:** [REDACTED]
- 12. Submission Text:** I am opposed to this proposal. The burden of proof should not fall to the individual. The data provided in the report specifically for the nutritional safety is based on data and reports that are recent. My opposition is the lack of long term data (independent) for the safety for human consumption and health long term, the safety of animals and therefore humans long term and the safety of the environment and therefore humans long term. This has not been satisfactorily demonstrated in this submission and no discernible satisfactory information regarding withdrawal of or risk management in the event this product were to be found harmful was found. To continue to allow these GMO's into our food and environment without such a policy is morally and ethically negligent.
