**Subject:** Submission on A1193 Irradiation of all fresh fruit and vegetables

**Categories:** [REDACTED]

To Whom It May Concern:

Please block approval of the proposal to irradiate fruits and vegetables from Queensland. This practice destroys the nutrients and enzymes in the food. This would negatively impact public health. This would negatively impact the value of Queensland export markets. This would negatively impact the Australian food supply. This is an issue not only for Queensland, but for all Australia as we all depend on Australian-grown food. I proudly look for "Australian Grown" on my food products. Let us protect that reputation.

Secondly, I also call attention to the shortened public consultation period. If the aim of this measure is to protect public health in regards to infection, it instead endangers public health due to dangerous food practices.

STOP this proposal!

Sincerely,

[REDACTED]
