Subject:

Submission on A1193 Irradiation of all fresh fruit and vegetables

Categories:

[REDACTED]

Dear Sir/Madam, we write to oppose the irradiation of all Fruits and Vegetables.

We do not fully understand the long term effects of irradiation of food.

We support consumers right to choose.

We believe that should this become a general practice then irradiated foods should be clearly labelled so that consumers can exercise their right to avoid such foods.

We think the adulteration of natural foods that have sustained us over time is a very bad idea.

--

Many thanks.

Matthew Gunningham
