To whom it concerns,

Just like the so called “ Vaccines”, the effect of long term consumption of GM Foods are unknown!Treating people like guinea pigs and not caring about the physical well-being of people. It is, surprise surprise, all about the dollar! Nothing else seems to matter! What a crazy world we live in.

It is well known that the companies that would self regulate will do so with profit and not much else in mind. GM's let loose on a large scale is immoral and a crime against humanity and nature!

The food codes are too weak as it is.

I am totally opposed to these proposed amendments!

People have a right to know what is in their food and how it has been produced.

It is their right to make informed decisions and the labelling laws must be accurate to the last detail to enable people to do so!

Thank you!
