To whom it may concern,

Polling shows that many people internationally do not want food that is genetically modified and as far as Australia and New Zealand are concerned our food products will not be recognised internationally as having such clean export products that we currently have if GM products are allowed to be sold in either of these two countries.

If any GM products are permitted they must be fully labelled as GM and be able to be traced.

I strongly oppose changes to the Food Code that would permit the sale of any GM products.

Yours sincerely

Anthony Opie
