Second Assessment Report for Proposal P1007-Primary Production & Processing Requirements for Raw Milk Products.

In reference to the above I am asking you to restore to Australia MILK PRODUCTS HOW THEY ARE MEANT TO BE CONSUMED - i.e. in their original state, how nature intended. In the Western world, which Australia is part of, there are adequate hygienic methods for consumers to buy raw milk and raw cheeses.

Why are we being deprived when our counterparts in other Western, advanced countries are enjoying the health benefits of these products and Australia is left out in the cold?

Please, please can we have real milk and real cheese in Australia!

Regards

Carolyn Simmons
