SUBMISSION re above application A1274 GM Banana –

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

-I am very concerned about the lack of safety testing done on these GM bananas and how it could effect my children and myself long term health because we have severe food allergies.

-So scientific evidence on the long term safety of these GM bananas must be required before the application could be considered in the future.

-So until there is scientific data/evidence showing the effects of the transgenes and inflammatory response in the small bowel flora, villi and epithelium, in long term studies, the GM Banana MUST be declined.

I want our food in NZ to continue to be GM free where we and our children, grandchildren are not being experimented on with un-natural, laboratory created 'food'!!
