I request the application re. A1274 GM Banana be declined.

It seems to me that using GM to produce bananas will be more risky than advantageous.

The fact that the GM includes seven new proteins means that people will have allergic reactions to some or all of them so "food safety" standards cannot be applied.

Allergies are a reaction by human beings reaction to foreign proteins and they can be fatal.

Please do not allow the production of GM bananas to proceed.

Yours sincerely,

[REDACTED]
