I request the 'clock be stopped' on application A1274 until robust scientific safety testing is conducted.

Or A1274 GM Banana must be declined.

There has been a lack of evidence to suggest that genetically modified foods such as bananas to be beneficial, especially to gut health. Therefore long term studies need to be conducted prior to risking the health of the public.

Most importantly, the public has not had adequate time to respond to this proposal of genetically modified bananas, and neither have they been consulted about the proposal with enough notice.

This is taking our rights away for our own health and safety, a right that is bestowed on us upon birth.

Conduct appropriate research or stop the process of GM bananas now.
