Re: A1274 - Food derived from disease-resistant banana line QCAV-4

Dear Food Standards,

I assume your organization is to protect consumers from contaminated food. In that line of thinking I encourage you to vote NO on A1274 for the GMO QCAV-4 Banana. We have enough poisons in our food supply. What happens in one part of the world affects all of us as inter-country commerce is very active.

God made the perfect banana. We've been eating them for thousands of years. Please don't ruin what is already perfect. Vote No on A1274.

Thank you for your consideration.

Wishing you the best,
