I wish to present my submission about the current changes under debate regarding the use and consumption of unpasturised Milk grown by local farmers in organic and sanitary conditions.

Whilst I understand that lot feeding of dairy cattle in the dairy industry, and the sickness that heards farmed in that manner justify pasturisation to remove blood and body cells from milk due to diseased heards, I personally prefer to buy and consume raw milk from herd share farms that grow the milk in more healthy heards which do not suffer the disgusting health that is promoted in commecialised dairy.

I have researched the matter thoroughly, and believe I have a right to purchase milk from hand reared cows on organic farms, and that I do. My health has improved, and because the farm share I am part of is organic, the cows are pasture fed , healthy and full of the vital life force.

I object strongly to the idea of commercialised milk industry lobbying away my right to drink raw healthy fresh cream, milk and butter products.

These people are using the Queensland Health Department to force their own commercial interests rather than really caring about the health of people.

I have lost a lot fo weight and my health has improved directly as a result of adopting the Raw Milk and Weston A Price Foundation's dietary guidelines. I have the blood tests from my G.P to prove my health and bdy mass index ratio has improved for the first time in years.

I support the production, cultivation and distribution of Raw Milk Products I ask respectfully that for individuals such as myself, the law ought support my freedom to eat traditional diets age old to the human race.

Thank you for your receipt of this submission,

Sincerely,  
Adam Stanley
