Submission for raw milk
Project P1007 - Primary Production & Processing Requirements for Raw Milk Products

To Whom it May Concern,

I am in favour of being able to purchase natural raw milk.

I believe our foods in general are too processed and that this is contributing to higher rates of sickness in our community.

For my children's health I am in favour of buying natural raw dairy products – like in other countries such as France.

The raw products have a far higher level of nutrients and vitamins than products which are Pasteurised and the goodness destroyed.

It would be a real bonus to the health of all Australians if they could buy natural, unprocessed dairy products.
