Re Proposal P1007 – Primary Production & Processing Requirements for Raw Milk Products

1. I was raised during WW2 and the only milk I was fed was POWDERED.
2. My siblings born later consumed RAW MILK
3. I was the only one in my family that required the removal of 6 teeth to allow sufficient space for my permanent teeth.
4. For some 50 years I suffered digestive problems and eventually was diagnosed as Lactose Intolerant. During these years I was only given PASTEURISED MILK.
5. In 1985 I was diagnosed with extreme Metal Poisoning and by 2000 my health had failed completely.
6. I was introduced to RAW JERSEY MILK in 2001 and since that time have continued to consume large quantities of RAW DAIRY PRODUCTS, all of which I have to make myself.
7. Of all the products I make, the temperature of the milk never exceeds 42° C. My understanding being that no natural milk bacteria is destroyed at or below this temperature.
8. In 2002, I had the privilege of participating in a 3 day workshop with Sally Fallon, the President of the Weston A. Price Foundation, who shared with us all the teachings of Dr. Price who applauds the consumption of RAW MILK from GRASS FED COWS and his findings confirm that crowded teeth are the result of nutritional deficiencies caused by the absence of necessary enzymes and nutrients that are killed during the heating process to create PASTEURISED MILK.
9. A series of Medical Tests in 2006 indicated that my health has improved to the point of a man 20 years younger than my age. X-Rays taken in 2007 of my Spine, damaged in 1980, shows that 2 discs have regenerated, one to 100% and the other 60%. All because my diet since 2002 includes 8 litres of GRASS FED RAW MILK per week, which I process into all my Dairy needs as set out in the Weston A. Price Foundation philosophies, along with other nutritionally dense foods.
10. I believe it is my RIGHT to choose the food that I find fulfils my health requirements.
11. I find it incredible that UNELECTED Government Bodies have taken the authority to dictate what we can and cannot consume.

In closing, I wish to be kept informed via hard copy, of all information regarding the procedures you are adopting in relation to Raw Milk.
