Hi there, just writing to advise you of my support amending legislation to allow the public to make their own decisions regarding purchasing of raw milk and raw milk products. I have two main reasons for supporting this:

1. The supply of raw milk products is occurring surreptitiously anyway, let's regulate it and ensure it is consistent, reliable and therefore safer for consumers 2. Regarding arguments of it being dangerous for people's health to consume raw milk - are alcohol and cigarettes illegal also? Perhaps if there were an excise tax on it, it would be easier to make its supply legal...

Regards,  
Annaliisa Hartfiel
