**Subject:** Re food derived from herbicide tolerant & insect protected

[REDACTED]

DO NOT accept any type of food which involves any type of GMO or MRNA or gene therapy as just like MRNA so called vaccines will prove detrimental to our health regardless of whatever tests you do on these products. It is all fake & people prefer the real food. There is probably a lot already on the market that people don't realise as packaging can be bit deceptive but we don't need any more & would prefer all the crap to be removed from shelves including food containing bugs.
