FYI – [REDACTED] has provided a copy of what was sent to Beijing last night and advised that they will also cable these points to all overseas posts, including Beijing, so that if it gets any wider publicity their posts are able to respond appropriately. He noted there is already awareness within DFAT and Austrade of the issue and they are also looking for formal advice. A cable will ensure that are all on the same page.

In my view the talking points and information from our website have been accurately incorporated into the DAWR points. If you agree I will respond to Brett and advise we have no concerns with them.

Regards

Gill

Hi Gillian

I have attached for your info the final set of points we sent across to our Beijing post last night – apologies we did not have time to run them back past you before they were sent.

That said, if there is anything in them that is of concern please let us know.

We will also now work these through with our media folks to pass formally to our DPMO.

Again many thanks for your assistance yesterday.

Regards
