I meant MfE, not MPI!

I don't think Andrew is the right person – we need the environmental side – either EPA or MPI.

Hi Leigh – yes, I'd actually intended getting short presentations from both Michael Dornbusch and Andrew Pearson, just so everyone is aware of the broader regulatory context to the discussion.

Hi Lisa

The other thing is that I note that OGTR activities are being represented. I think we need the same from NZ.....

Subject: New Breeding Techniques Workshop

Thank you to those who have responded to our earlier emails regarding the workshop on new breeding techniques. It has just been brought to our attention however that the proposed date of 24th August clashes with the date of the upcoming ISFR meeting – our apologies for this oversight.

Given the date of the 17 August was the least preferred, and that 24 August is no longer an option, **we are now proposing that the workshop be held on Wednesday 31 August in Canberra** (as there wasn't a strong preference expressed by respondents for Melbourne as a venue). The meeting will be held at the FSANZ offices, which means we can offer teleconference facilities for those who are unable to make it in person. For jurisdictions attending in person, we ask that you limit your numbers to 3 so we can all fit in the conference room. A draft program is attached.

For those jurisdictions that we still haven't heard from, we would appreciate if you could get back to us as soon as possible to indicate your attendance either in person or via phone. For those who have already responded, could you please confirm that the new date of 31st is OK.

Once again apologies for the mix up regarding the date.

Thanks
Lisa
