PUBLIC SUBMISSIONS AGAINST NEW APPROVALS FOR GE/GM FOODS

- Submission on A1035 (MON 87701)

I Franceine Waldron **object** to approval of:

Application A1035 - Food derived from
purported insect-protected soybean Line MON 87701

I request FSANZ does **NOT** give these products approval because:

The aforementioned applications amount to:

A misuse of public money.

I object to genetic engineering/modification

The product(s) and by-product(s) of these applications are

Contaminated products

Contaminated/hazardous waste

Trespass of G.E products into the food chain, environment and waterways

Wasted public money on G.E/G.M research

Trade embargoes/sanctions on NZ exports due to NZ food and ecosystems being contaminated with G.E/G.M

Detrimental financial impact on the New Zealand economy

There is a failure of justice in forcing New Zealand consumers and others to carry risks of accidental consumption, and the additional costs incurred to avoid GE/GM products.

It has been said that G.E/G.M is scientific fraud and I agree with this.

Environmental effects to the environment and biodiversity are unacceptable

G.E/G.M is unacceptable and unethical

I request FSANZ does **NOT** give G.E/G.M applications approval
