Subject: (GM product): Submission: Application A1041 – Food derived from SDA Soybean Line MON 87769

As a NZ citizen I hereby submit my public comment on the proposal shown in the Subject of this email as follows:

Genetically modified products still have many unproven safety standards (both human & environment) and therefore have unknown possible risk factors for the current and future generations of many life forms. The long-term impact, especially, is as yet unproven. The importance of this product is simply not enough to warrant exposing risks to ourselves and Nature and I object to it's further development and use.

I therefore strongly oppose any development and use of all genetically modification. Please do not approve this application.

Unfortunately I will not be able to attend any meetings or other events relating to this proposal.

Thank you for your time and consideration,
Leo Adler
