**Subject:** Submission: Application A1060 – Food derived from Insect-protected Corn Line 5307

Dear Sir/Madam,

I am writing to urge you to reject the application A1060 for three reasons:

1. there have been no **long term** studies done on the safety of this product;
2. it goes against common sense to deliberately ingest pesticides which is what this corn effectively contains;
3. there has been no independent study done on the safety of this corn line.

I have no desire to eat GM food and do not wish to see further contamination of Australian crops with GMOs.

Yours faithfully  
Michael Byrne
