To Whom It May Concern.

I strongly appose the change of laws to enable the Genetically Modified Soy Beans to be grown.

Monsanto has a history of introducing genetically modified and patented seed, only to have it blow into and cross breed with, other farmers Non GM or even at times ORGANIC crops, AND THEN SUE THEM FOR COPY RIGHT INFRINGEMENT. I for one, and amongst many others do not want to this corporations atrocities inflicted upon our perhaps already struggling farmers.

WHY ARE YOU EVEN CONSIDERING ALLOWING A COMPANY TO BRING THEIR TRAIL OF DESTRUCTION HERE? THEY HAVE CREATED A GENETICALLY MODIFIED PLANT TO RESIST THEIR OWN HERBICIDE. This will help to deplete and destroy precious humus and top soil endangering biodiversity, the water table, other farms, future crops, and OUR HEALTH.

AND THAT MAKES PERFECT SENSE TO YOU GUYS?

AND YOU ARE GOING TO ALLOW THEM TO CHANGE OUR LAWS??

Monsanto has shown and continues to have little to no regard for community, biological diversity and ethical practices.

WHO ARE THEY PAYING OFF?

Australians by and large are against genetically modified foods. I am sure there would be a general consensus about this issue.

DO NOT ENDORSE THIS COMPANY. IF YOU DO YOU ARE NOT REPRESENTING THE VOICES AND ISSUES OF THE PEOPLE.

THERE ARE PLENTY OF ALTERNATIVES AND YOU KNOW IT.

Yours Sincerely,

Jilli Manning
A VERY CONCERNED AUSTRALIAN
