Subject: Herbicide-tolerant Soybean MON87708

Dear FSANZ,

I do not want to allow GM foods into New Zealand and Australia's food standard code. I would like my submission to be on 2x points.

1. That we do not allow GM Soybean MON87708 to enter our food chain.
2. If GM foods do enter the food chain then I would like to submit that
 - I. Clear large labelling on all products that contain any GM product. i.e. "CONTAINS GM FOOD"
 - II. Clear large labelling on all processed foods that contain GM ingredients – i.e. muesli's, baking mixes etc that contain Soybean or any other GM ingredient
 - III. Clear large labelling on all Menu's etc - Where further processing of food includes GM ingredients (Restaurants, café's etc)

Please let us consumers make our decisions with FULL knowledge. We can make our own informed decision IF the information is readily available (Large labelling clearly stating CONTAINS GM or an industry standard that tells us this).

Kind Regards

John Crombie
