**Follow Up Flag:** sent contact form  
**Flag Status:** Completed

Dear Sirs,

- Data submitted in the IRRI application support the conclusion that food and/or animal feed derived from GR2E rice is as safe and nutritious as food or feed derived from conventional rice varieties.
- FSANZ also has conducted a thorough safety assessment, including a dietary intake assessment (DIA), and has determined there are no public health or safety concerns.

This is to express my full support for the application of Golden Rice GR2E to be included in the Food Standards Australia New Zealand (FSANZ) code,

Therefore,

Yours sincerely

Moisés Burachik, PhD

Director, Regulatory Affairs
