Subject:

Submission on Application A1192 re food derived from herbicide tolerant corn
MON87429

I urge you to decline the above application, which would see the introduction of a strain tolerant to 12 toxic pesticides and coated with a known neonicotinoid.

Aotearoa

/New Zealand is proud of its GE-free status, no more so than Northland.

It is totally undemocratic to foist a decision allowing this travesty on our population and trade prospects whilst New Zealanders are pre-occupied with dealing with the Covid-19 crisis; and it would certainly breach our Treaty of Waitangi obligations by failing to consult with Tangata Whenua as well as the wider population.

Yours faithfully
