**Subject:** Irradiation of all fresh food

To Whom It May Concern

Approval for A1193 - the irradiation of ALL fresh fruits and vegetables is tantamount to waging war on the population. The nutrients in foods essential to our good health will be reduced and the molecular structure disrupted and free radicals and chemicals formed. The general health of the population has deteriorated over the decades with fast foods, trans fats and chemically laden foods being consumed in such quantity. Cancer, heart disease and diabetes is on the rise as is dementia in older folk. The destruction through irradiation of fresh foods will render the population chronically ill and shorten lives. I am against irradiation. Do not allow it to happen.

Yours sincerely
