Hello

I am a concerned consumer with a long- standing interest in health and well-being.

Please do not change the code to irradiate all fruit and vegetables. Keep it the same.

Our health is already under attack from various environmental sources, including but not limited to global warming, loss of soil health, pesticides, plastics and the pandemic.

In these circumstances, our ability to consume healthy fruit and vegetables is more important than ever so please keep irradiation away from this produce.

Yours sincerely
