Subject: Submission on A1193 Irradiation of all fresh fruit and vegetables

To say this is insane is an understatement. It's ludicrous that a government would even want to pollute every piece of fruit & vege for sale let alone suggest it!

I'm saddened that this is considered an option. This is just pure stupidity!!!

As an organic shop owner I am even more angered that people who wish to grow food without synthetic pesticides and chemicals and they have to pay loads of money for certification on top of registering in fruit fly free areas to be able to sell their door to us in Tasmania, and then people who spray every chemical under the sun on their "food" and don't have to label everything that's been sprayed on their farms and their crops. It's just lies and deception.

The world I'd like to see is one where every product and food on the shelf has to list every pesticide chemical, GMO, processing aid be listed on every lettuce or can of baked beans or jar of olive oil. This is truth in advertising and truth in food production. Are FSANZ about truth in food or just their sponsors??
